sem′i (sĕm′ĭ), *adj.* Half; partial, approximately half.

sem′i, *n.* Short for SEMIDETACHED HOUSE. *Colloq., Eng.*

sem′i, sem′ie (sĕm′ĭ), *n.* = SEMIBEJAN.

Sem′i-ah′moo (sĕm′ĭ-ä′mōō), *n.* An Indian of a Salishan tribe of the coast of Washington and British Columbia.

sem′i-an′thra-cite (sĕm′ĭ-ăn′thrə-sīt), *n.* A variety of coal intermediate between anthracite and bituminous coal, esp. when approaching anthracite in nonvolatile character.

sem′i-an-tique′ (-ăn-tēk′), *adj. & n.* See SEMI-; specif., *Rugs,* see ORIENTAL RUG.

sem′i-ape′ (sĕm′ĭ-āp′), *n.* A lemur.

sem′i-arch′ (-ärch′), *n.* An arch having only one springer and terminating at its highest point.

Sem′i–Ar′i-an, *n. Eccl. Hist.* One of the Homoiousians led by Basil, bishop of Ancyra (c. 358); — a misleading epithet first applied by Epiphanius. Members of this group were treated as allies by Athanasius, and their successors eventually joined forces with the Homoiousians. — **Sem′i–Ar′i-an,** *adj.* — **Sem′i–Ar′i-an-ism,** *n.*

sem′i-au′to-mat′ic (sĕm′ĭ-ô′tō-măt′ĭk), *adj.* Not wholly automatic; specif.: **a** Operated partly automatically and partly by hand; as, a lathe that operates automatically after insertion of the rough piece by the operator is *semi-automatic.* **b** *Firearms.* That employs gas pressure or force of recoil and mechanical spring action in ejecting the empty cartridge case after the first shot and loading the next cartridge from the magazine, but that requires release and another pressure of the trigger for firing each successive shot. Cf. AUTOMATIC, *adj.,* 3. — *n.* A semiautomatic lathe or gun. — **sem′i-au′to-mat′i-cal-ly** (-ĭ-kăl-ĭ), *adv.*

Sem′i–Ban′tu′, *adj.* Belonging to, having the characteristics of, or designating, an indeterminate group of languages spoken in the region north and west of the Congo, esp. in the Cameroons and Guinea, resembling the Bantu languages in structure or vocabulary, and perhaps in part representing an earlier stage of Bantu. — **Sem′i-Ban′tu′,** *n.*

sem′i-bas′tion (sĕm′ĭ-băs′chŭn; -băs′tĭ-ŭn), *n. Fort.* Either half of a bastion as divided by a line bisecting the salient angle.

sem′i-beam′ (sĕm′ĭ-bēm′), *n.* A cantilever.

sem′i-be′jan (-bē′jăn), *n.* In some Scottish universities, a second-year student; — called also *semibachelor.*

sem′i-bi-tu′mi-nous (-bĭ-tū′mĭ-nŭs), *adj.* Half or somewhat bituminous; — applied to a variety of coal intermediate between bituminous coal and anthracite, averaging from 15 to 20 per cent of volatile matter.

sem′i-breve′ (sĕm′ĭ-brēv′), *n.* [*semi-* + *breve;* cf. F. *semibrève,* It. *semibreve.*] *Music.* A note having half the time value of the breve and twice that of the minim; — now usually called a *whole note.* It is the longest note in general use. See NOTE, 14 a; MENSURABLE MUSIC.

Forms of the Semibreve: *a* Medieval; *b* Modern.

semibreve rest. *Music.* A rest equal in value to the semibreve. See REST, *n.,* 12.

sem′i-bull′ (-bōōl′), *n. R.C.Ch.* A bull issued by a pope between his election and coronation.

se′mic (sē′mĭk), *adj.* Of or pertaining to a sign or, specif., a semeion.

-sem′ic (-sĕm′ĭk; -sē′mĭk). [Gr. *-sēmos* (as in okta*sēmos* octasemic) + *-ic.*] *Pros.* A combining form denoting *having* (so many) *units of time,* as in deca*semic.*

sem′i-ca′dence (sĕm′ĭ-kā′dĕns), *n. Music.* A half cadence. See CADENCE, 6 c.

sem′i-car′ba-zide (-kär′bə-zīd; -zĭd), *n.* Also **-zid** (-zĭd), **-zine** (-zēn; -zĭn), **-zin** (-zĭn). *Chem.* A crystalline compound, $NH_2CONHNH_2$, the hydrazide of carbamic acid. It is used as a reagent for aldehydes and ketones.

sem′i-car′ba-zone (sĕm′ĭ-kär′bə-zōn), *n. Chem.* A compound characterized by the group >C:NNHCONH$_2$ and formed by the action of semicarbazide on an aldehyde or ketone. The semicarbazones are used to identify aldehydes and ketones.

sem′i-cas′trate (-kăs′trāt), *v. t.* To deprive of one testicle. — **sem′i-cas-tra′tion** (-kăs-trā′shŭn), *n.*

sem′i-cau′date (-kô′dāt), *adj.* Having a rudimentary tail.

sem′i-cell′ (sĕm′ĭ-sĕl′), *n. Bot.* Either of the halves of a desmid cell.

sem′i-cen′te-nar′y (-sĕn′tē-nĕr′ĭ; -sĕn-tĕn′ə-rĭ; *or, esp. Brit.,* -sĕn-tē′nə-rĭ, -sĕn′tē-nə-rĭ), *n.* A semicentennial.

sem′i-cen-ten′ni-al (-sĕn-tĕn′ĭ-ăl; 159), *adj.* Or of pertaining to, or occurring at the completion of, half of a century. — *n.* A fiftieth anniversary or its celebration.

sem′i-cho′ric (-kō′rĭk; -kŏr′ĭk; *cf.* CHORIC), *adj.* **a** Of or pertaining to a semichorus. **b** Half choral in character, as utterance half sung and half spoken.

sem′i-cho′rus (sĕm′ĭ-kō′rŭs; 181), *n. Music.* A half chorus; a passage to be sung by a selected portion of the voices, as by a few voices from each part, or by either the male or female voices only, in contrast with the full chorus. Also, the portion of voices or singers so selected.

sem′i-cir′cle (-sûr′k'l), *n.* **1. a** The half of a circle, from one end of a diameter to the other; a semicircumference. **b** Either half of a circular area divided diametrically.
2. A body, formation, or arrangement, of objects in the form of half of a circle, or half of a circumference.
3. An instrument of semicular form, used esp. for measuring angles; specif., a graphometer.

sem′i-cir′cle, *v. t.* To form or throw into a semicircle. — *v. i.* To form or move in a semicircle.

sem′i-cir′cled (-k'ld), *adj.* Semicircular.

sem′i-cir′cu-lar (-sûr′kū-lĕr), *adj.* Having the form of, or pertaining to, a semicircle. — **sem′i-cir′cu-lar′i-ty** (-lăr′ĭ-tĭ), *n.* — **sem′i-cir′cu-lar-ly,** *adv.* — **sem′i-cir′cu-lar-ness,** *n.*

semicircular canal. *Anat. & Zool.* Any one of the loop-shaped tubular parts of the membranous labyrinth of the ear of vertebrates, communicating at each end with the utriculus and having near one end an expansion (*ampulla*) containing an area of sensory epithelium. They are enclosed in corresponding canals of the bony labyrinth and are filled with endolymph. In all vertebrates above cyclostomes the canals are three in number and are usually in planes nearly at right angles to each other. They are regarded as furnishing nervous impulses associated with equilibrium.

semicircular line of Douglas. A crescent-shaped line marking the end of the rectus abdominis muscle immediately below the level of the iliac crest.

sem′i-cir-cum′fer-en′tor (sĕm′ĭ-sĕr-kŭm′fĕr-ĕn′tĕr), *n. Surv.* A kind of circumferentor or dial with two fixed vertical sights, one at each end of the base of the horizontal graduated semicircle surrounding the compass, and a movable arm, carrying a vertical sight at each end, pivoted to the center of the base of the semicircle. It is used for setting out land or buildings to any angle and in preliminary survey work generally.

Semicircumferentor.

sem′i-cirque (sĕm′ĭ-sûrk), *n.* A semicircle; a semicircular hollow or opening among trees or hills.

sem′i-civ′i-lized (-sĭv′ĭ-līzd), *adj.* Partially civilized; approaching civilization; — of peoples emerging from low culture under the tutelage of a civilized race. Cf. BARBAROUS. — **sem′i-civ′i-li-za′tion** (-lĭ-zā′shŭn; -lĭ-zā′-), *n.*

sem′i-clas′sic (-klăs′ĭk), **sem′i-clas′si-cal** (-ĭ-kăl), *adj.* Half or partly classical; — applied esp. to schools in which Latin, but not Greek, is taught.

sem′i-climb′ing (-klīm′ĭng), *adj.* Inclined to climb; — said of plants that are somewhat vinelike in habit. — **sem′i-climb′er** (-ẽr), *n.*

sem′i-coke′ (sĕm′ĭ-kōk′), *n.* The cokelike residue obtained by carbonizing coal, peat, cellulose, etc., at a relatively low temperature (usually below 600° C. or 1112° F.). That from coal is in general softer and more friable than coke. It gives a hot, smokeless fire and can be used as a domestic fuel, in generating steam, etc.

sem′i-co′lon (sĕm′ĭ-kō′lŏn), *n. Punctuation.* A point [;] used in printing and writing chiefly in a co-ordinating function between major sentence elements, separating them with more distinctness than comma or dash. Its most common specific uses are: (1) To mark antithesis between the ideas of major sentence divisions. (2) To effect transition between main clauses when lacking a connective and when succeeding each other in a swiftly moving passage. (3) Typically, to introduce a second main clause when the connective is *also, hence, nevertheless, therefore,* and the like. (4) To mark the larger breaks in a series, as in lists of books with pagination data, or of addresses, and of other types of items including commas. (5) To separate phrases and clauses containing commas; as, "As Caesar loved me, I weep for him; as he was fortunate, I rejoice at it," etc. (6) To separate clauses or phrases having common dependence; as, "There is tears for his love; joy for his fortune; honor for his valor; and death for his ambition." (7) To indicate apposition, often when the appositive group is elliptical for a main clause; — formerly always, now in variation with lighter points, before *namely, to wit, viz., as, i. e.,* and the like, introducing an example or enumeration of particulars.

semicolon butterfly. The violet tip.

sem′i-col′umn (sĕm′ĭ-kŏl′ŭm), *n.* A half column; a column bisected longitudinally, or along its axis. — **sem′i-colum′nar** (-kə-lŭm′nĕr), *adj.*

sem′i-con′scious (sĕm′ĭ-kŏn′shŭs), *adj.* Half conscious; imperfectly conscious. — **sem′i-con′scious-ly,** *adv.* — **sem′i-con′scious-ness,** *n.*

sem′i-con-tin′u-um (-kŏn-tĭn′ū-ŭm), *n.* [NL.] *Geom.* An imperfect continuum.

sem′i-con-ver′gence (-kŏn-vûr′jĕns), *n. Math.* Of a series, state of being semiconvergent.

sem′i-con-ver′gent (-kŏn-vûr′jĕnt), *adj. Math.* **a** Not unconditionally convergent; — said of a convergent series for which the series obtained by replacing each term by its modulus is not convergent, as, the series $1 - \frac{1}{2} + \frac{1}{3} - \frac{1}{4} + \ldots$. The sum of a *semiconvergent* series depends upon the order of the terms; — opposed to *absolutely convergent.* Called also *conditionally convergent.* **b** Having one or more principal values; — of a divergent integral.

sem′i-cu′bi-cal (-kū′bĭ-kăl), *adj. Math.* Characterized by the square root of the cube of a quantity. See PARABOLA.

sem′i-cur′sive (sĕm′ĭ-kûr′sĭv), *n. Paleog.* A Roman miniscule cursive, with the principal strokes thickened, used as a book hand, about the 5th to the 9th centuries.

sem′i-cy′clic (-sī′klĭk; -sĭk′lĭk), *adj. Chem.* Half or partly cyclic; as, a *semicyclic* compound (one containing both a ring and a chain); a *semicyclic* double bond (one attached to a ring but not a part of it).

sem′i-def′i-nite quad-rat′ic form (-dĕf′ĭ-nĭt). *Math.* A quadratic form which, when transformed by a real linear transformation of the variables (to a sum of square terms), has at least one of the coefficients zero and the nonzero coefficients all of the same sign. When this sign is positive the form is *positively* semidefinite, and when negative, *negatively* semidefinite.

sem′i-de-po′nent (-dē-pō′nĕnt; 128), *adj. Gram.* Denoting a type of verb deponent only in certain of its tenses.

sem′i-de-tached′ house (-dē-tăcht′). Either of two houses built together with a party wall.

sem′i-di-am′e-ter (sĕm′ĭ-dī-ăm′ē-tĕr), *n.* **1.** *Math.* **a** A radius of a circle. **b** Either of two lines from the center of an ellipse to the curve each being parallel to the tangent to the ellipse at the extremity of the other.
2. *Astron.* The angle subtended by the semidiameter (sense 1) of a celestial body as seen from the center of the earth. It is expressed in angular units.

sem′i-di′a-pa′son (-dī′ə-pā′zŭn; -z'n; -sŭn; -s'n), *n. Medieval Music.* A diminished octave.

sem′i-di′a-pen′te (-pĕn′tē), *n. Medieval Music.* An imperfect or diminished fifth.

sem′i-di′a-tes′sa-ron (-dī′ə-tĕs′ə-rŏn), *n. Medieval Music.* A diminished fourth.

sem′i–die′sel (sĕm′ĭ-dē′zĕl), *adj.* **a** Designating an internal-combustion engine of a type resembling the diesel engine in using heavy oil as fuel, but employing a lower compression pressure (100 to 350 pounds per square inch), and igniting the charge by spraying it, under pressure, against an uncooled portion (*hot surface* or *spot*) of the combustion chamber (*hot-surface,* or *hot-spot, ignition*); or by spraying it into a separate chamber (*hot bulb, pot,* or *tube*) kept above the ignition temperature of the charge by the heat of compression (*hot-bulb ignition*), or by igniting it by the precombustion or supercompression of a portion of the charge in a separate member or in compressed portions of the combustion chamber. **b** Designating a true diesel engine using other means of fuel injections than compressed air. **c** A mixed-cycle engine closely resembling a diesel engine. Semi-diesel engines are usually of the two-stroke-cycle type and below 50 horsepower.

sem′i-dine (sĕm′ĭ-dēn; -dĭn; 157), *n.* Also **-din** (-dĭn). [*semi-* + benz*idine.*] *Chem.* Any of a group of bases which are amino derivatives of diphenylamine ($C_6H_5NHC_6H_5$) and are distinguished as *orthosemidines* and *parasemidines* according as the amino group is in the ortho or para position. Their most noteworthy formation is by a molecular rearrangement of hydrazo compounds (as p-RC_6H_4-$NHNHC_6H_4$ → p,p'-$RC_6H_4NHC_6H_4NH_2$), called the *semidine rearrangement,* in distinction from the *benzidine rearrangement,* because only one NH group becomes an amino group.

sem′i-di′tone′ (-dĭ′tōn′), *n.* Also **sem′i-di′to-nus** (-dĭ′tō-nŭs). [*semi-* + *ditone;* cf. It. *semiditono.*] *Medieval Music.* A hemiditone.

sem′i-di-ur′nal (-dī-ûr′năl; -n'l), *adj.* **1.** Pert. to, or accomplished in, half a day; also, occurring twice a day.
2. a Pertaining to the arc (or traversed in the time) between the meridian and a celestial body's rising or setting. **b** Occurring approximately every half day; as, the *semidiurnal* tides.

sem′i-dome′ (sĕm′ĭ-dōm′), *n. Arch.* A roof or ceiling covering a semicircular, or nearly semicircular, room or recess. It is approximately the quarter of a hollow sphere. — **sem′i-domed′** (-dōmd′), *adj.*

sem′i-dou′ble (-dŭb′'l), *n. Eccl.* A feast of less solemnity than a double.

sem′i-dou′ble, *adj.* See SEMI-.

sem′i-dress′ (sĕm′ĭ-drĕs′), *n.* Semiformal dress. — **sem′i-dress′y** (-drĕs′ĭ), *adj.*

sem′i-dry′ing (-drī′ĭng), *adj.* Imperfectly drying; — applied to fixed oils, as cottonseed oil, intermediate between drying oils of the linseed-oil group and nondrying oils. See OIL, *n.,* 1.

semian, semianna. † SHAMIANAH.

sem′i-bach′e-lor *n.* = SEMIBEJAN. [*Obs.*]

sem′i-brief′, *n.* = SEMIBREVE.

sem′i-car′di-nal, *adj. & n. Naut.* = INTERCARDINAL. *Rare.* [2 b.]

sem′i-clause′, *n.* See CLAUSE.

sem′i-con′so-nant, *n. Phonet.* = SEMIVOWEL. — *adj.* = SEMIVOCAL. — **sem′i-con′so-nan′tal,** *adj.*

sem′i-cope′, *n.* A short or inferior cope. *Obs.*

sem′i-cro′ma (-krō′mə), *n.* Also **sem′i-crome.** [*It. semicroma.*] = SEMIQUAVER.

sem′i-crotch′et, *n.* A semicroma. *Obs.* [cupium. *Obs.*

sem′i-cupe (sĕm′ĭ-kūp), *n.* Semi-

sem′i-cu′pi-um (-kū′pĭ-ŭm), *n.* [ML., *semicupium,* fr. L. *semi-* half + *cupa* tub.] = SITZ BATH.

Se-mi′da (sē-mĭ′də). *D. Bib.*

Se-mi′da-ites (-dā-ĭts). *D. Bib.*

sem′i-dem′i-, = DEMISEMI-.

sem′i-de-tacht′. Semidetached *Ref. Sp.*

sem′i-dole′, *n.* [*semi-* + L. *dolium* a jar.] = PIPE, 9 a. *Obs.*

sem'i·ef'fi·gy (sĕm'ĭ·ĕf'ĭ·jĭ), *n.* A half-length effigy.

sem'i·e·li'sion (-ē·lĭzh'ŭn), *n.* = SEMIHIATUS.

sem'i–Eu·clid'e·an ge·om'e·try. *Math.* A geometry (resulting from the rejection of the axiom of Archimedes) in which similar triangles exist, in which the sum of the angles of any triangle is two right angles, and in which an infinity of nonintersectors of a line may be drawn through a point not on the line in the plane of the point and line.

Gr. *Sēm.*] **1.** One of the descendants of Shem. **2.** A member of a Caucasian race now chiefly represented by the Jews and Arabs, but in ancient times including also the Babylonians, Assyrians, Aramaeans, Phoenicians, and various other peoples of southwestern Asia. Cf. SEMITIC LANGUAGES.

The term *Semite* is used both in an ethnological and in a linguistic sense. As originally employed by J. G. Eichhorn at the close of the 18th century, it embraced the peoples grouped in Gen. x. as the "sons of Shem." Since, however, it has been ascertained that the peoples thus grouped do not belong to one or even to allied races, the ethnological application of the term race has been modified to designate a race distinguished by the following features: dolichocephalic skulls; curly and abundant hair; slightly wavy or straight strong beard, the color predominantly black; prominent nose, straight or aquiline; oval face. *Dict. of Bible (Hastings).*

sem'i-ten'di-no'sus (sĕm'ĭ-tĕn'dĭ-nō'sŭs), *n.* [NL. (sc. *musculus*). See SEMI-; TENDINOUS.] *Anat.* A fusiform muscle of the posterior and inner part of the thigh. It arises from the tuberosity of the ischium, along with the biceps femoris, and is inserted by a remarkably long, round tendon, which forms part of the inner hamstring, into the inner surface of the upper part of the shaft of the tibia.

Se-mit'ic, *n.* **1.** A Semite.

2. a A Semitic language. b *Rare.* The Semitic family of languages.

Se-mit'i-cism (-ĭ-sĭz'm), *n.* Semitism.

Semitic languages. A family of inflectional languages, possessing records of extreme antiquity, now spoken mainly in Arabia, Palestine, Syria, Iraq, Egypt, and the other countries of North Africa. Together with the Egyptian, a Semito-Hamitic tongue, the Semitic languages have the longest recorded history (cf. BABYLONIAN). They are also the least diversified of the great linguistic families, the various groups presenting a close and compact relationship. Certain common characteristics indicate the connection with the Hamitic languages (which see), but affiliation with other families, as the Indo-European, has not been established. Among the chief features of the Semitic languages are: triconsonantal roots; the expression of variations in meaning or relation by a peculiar system of internal vocalic change and by prefixes, suffixes, and inflectional endings; meagerness in composition and in mood and tense, but richness in aspect (see ASPECT, 10; INFLECTIONAL LANGUAGES). These languages are supposed to have been the first to evolve a true alphabet (see ALPHABET; cf. CUNEIFORM). The languages may be classified as follows:

TABLE OF SEMITIC LANGUAGES

2. *Ethics.* The doctrine that feeling is the sole criterion of good; sensualism.
3. *Philos.* The doctrine that all our knowledge originates in sensation or sense perceptions, or, in a narrower meaning, that all knowledge is made up of sense elements. *Sensationalism* is traced back to the Sophists and Cyrenaics, while it also found expression both with the Epicureans and the Stoics. The latter, though they did not restrict knowledge to sensation except in origin, held that the mind is at first a *tabula rasa* (blank tablet) on which the outer world gradually imprints its image by means of sense impressions. This is substantially the view of Hobbes, the founder of modern *sensationalism,* and of Locke, who, however, placed considerable emphasis upon ideas which are the result of reflection upon ideas of sense, and so only indirectly derived from sensation. Condillac, the most characteristic modern sensationalist, considers all consciousness transformed sensation.

2. Of or pertaining to sensation.
sense (sĕns; 232), *n.* [F. or L.; F. *sens,* fr. L. *sensus,* fr. *sentire, sensum,* to perceive, to feel; akin to OHG. *sin* sense, mind, *sinnan* to go, to journey, G. *sinnen* to meditate, to think, and to E. SEND. Cf. ASSENT, CONSENT, RESENT, SCENT, SENTENCE, SENTIENT, SENTIMENT, SENTINEL.]
I. Perception.
1. Sensuous perception, now esp. when aesthetic or emotional; also, chiefly *pl.*, one of its avenues of perception; as, to feast one's *senses.*

Making reason give place to *sense.* *Sidney.*

2. Mind; sentience; consciousness; intelligence.

As if the steel had *sense.* *Spenser.*

3. Sense perception; sensation; sensibility; feeling.

The *sense* and the affects of any one part of the body instantly make a transcursion through the whole. *Bacon.*

The very character and essence of *sense* is isolation, and therefore in apprehending variety, series. *B. Bosanquet.*

4. Sound perception and reasoning; correct judgment; good mental capacity; also, that which is sound, or reasonable; as, no *sense* in waiting.

Good *sense,* which only is the gift of Heaven. *Pope.*

5. A perception or sensation; — with *of;* as, a *sense* of thirst or heat; also, awareness; impression.

Sense of the gnawing fire at heart and brain. *Keats.*

6. A perception through the intellect; realization; understanding; discernment; appreciation; as, a *sense* of the value of money.
7. Hence: **a** Sensitive, esp. sympathetic or grateful, recognition; as, a *sense* of God's mercies or of one's regard. **b** A moral perception or appreciation; recognition.

c A perceptive notion of a condition or contingency; as, a *sense* of security, of coming danger, that all is not well. **d** A self-conscious, motivating awareness or conviction; as, a *sense* of shame, injury, dignity.
II. That by which one perceives.
8. a Formerly the faculty of receiving mental impressions through the action of certain organs (sensory or sense organs) of the body, or of perceiving changes in the condition of the body; also, any special faculty of sensation. Aristotle distinguished the *five senses* of sight, hearing, smell, taste, and touch. Other senses have been or are added, as the muscular *sense,* temperature *sense,* sexual *sense,* etc. Various occult and spiritual *senses* have also been postulated, as the "*sense* of the heart" of Jonathan Edwards, immediately perceiving spiritual worth or truth. Imagination and memory have been distinguished as *internal* senses from the perceptive as *external* senses. ***Sense discriminations*** are distinguished by psychologists as qualitative, intensive, extensive, and temporal, while feeling tone may attach to any sensation as its affective concomitant.

He really accepted, like Kant, the hypothesis of a *sense* of sensations which led to Kantian conclusion that the nature we know in time and space is mere sensible appearance in us. *Thos. Case* (*Encyc. Brit.*).

b Now: (1) A specialized mechanism or function by virtue of which an animal is receptive and responsive to a certain class of stimuli, typically external, as in the case of the senses of sight, hearing, smell, taste, touch, temperature, or pain, but also internal, as in the case of the kinesthetic and organic senses. (2) The total function comprising the several senses, regarded as a unit in distinction from the functions of movement, thought, etc.; as, knowledge derived from *sense; sense* experience.
9. A sense organ, as the eye or ear.
10. Power or means of perception; as, to lull one's *senses.*

The most vital parts are not the quickest of *sense.* *Bacon.*

11. An ability to perceive or estimate; as, a *sense* of location or time.
12. Faculty of intellectual and aesthetic understanding and appreciation; as, a *sense* of beauty or humor.
13. An instinctive comprehension of the fine points, and acuteness or resourcefulness in gaining mastery or success in respect to a particular art, game, medium, or the like; as, a mathematical or musical *sense;* air *sense;* language *sense.*
III. Signification.
14. One of the multifold meanings, literal, anagogic, moral, mystic, etc., which were considered present in the Bible or in allegorical writings, as the Divine Comedy.
15. Hence: **a** *Archaic.* Intended meaning. "You miss my *sense.*" *Shakespeare.* **b** One of two or more meanings according to which a passage may be construed.

The King's letter would not bear that *sense.* *Clarendon.*

c One of the differing meanings which a word may bear; specif., one of its meanings as segregated in a dictionary entry.
16. Meaning; signification; as, the true *sense* of words.

So they read in the book . . . and gave the *sense.* *Neh.*

17. That which is felt or is held as a sentiment, view, or opinion; judgment; opinion; — now chiefly of aggregates of persons; as, the *sense* of the meeting.
18. General or essential meaning; purport; drift; gist; as, the *sense* of a report or recommendation.
19. That element in a piece of writing which bears the signification.

The sound should seem an echo to the *sense.* *Pope.*

20. Meaning that is rational or intelligible.

He speaks *sense.* *Shak.*

21. Prose supplied to students for expression in Greek or Latin verse.
22. [F. *sens.*] **a** Direction; trend; course. **b** Direction of a relation, operation, or any set of ordered terms; as, if *a* precedes *b*, then in the opposite *sense, b* follows *a. H. C. Jones.*
23. *Geom.* One of two opposite directions in which a line, surface, or volume, may be supposed to be described by the motion of a point, line, or surface, or to be reckoned; — opposite senses being denoted by opposite signs, + and −. Cf. RIGHT-HANDED SCREW CONVENTION.
24. *Physiol.* The central nervous effect resulting from excitation of one or more of a group of similar receptors or sense organs, as in sight, kinesthesia, etc. It may or may not be apparent in consciousness.

☞ COMBINATIONS (all adjectives) are:

sense-bereaving **sense-confounding** **sense-distracted**
sense-bound **sense-confusing** **sense-ravishing**

Syn. — SENSE, SENSATION, SENSIBILITY, SENSITIVENESS, SUSCEPTIBILITY are here compared in their nontechnical uses; for technical senses see defs. SENSE, as here discriminated (see REASON, MEANING), denotes a feeling or consciousness which is vaguer or less corporeal or objective than that denoted by SENSATION; as, "He would not observe her, but he had a *sense* of an elastic walk" (*G. Eliot*); "a general *sensation* of drowsy warmth and vast light and exotic vegetation" (*Lafcadio Hearn*); "a *sense* sublime of something far more deeply interfused" (*Wordsworth*); "*sensations* sweet, felt in the blood, and felt along the heart" (*id.*). SENSIBILITY is capacity, esp. keen or delicate, of emotion or feeling; SENSITIVENESS is acute, sometimes morbid, sensibility; as, "His *sensibility* and nervous exaltation gave [his poetry] the gift of rendering with wonderful felicity the magical charm of nature" (*M. Arnold*); "the nerveless sentimentalist and dreamer, who spends his life in a weltering sea of *sensibility*" (*W. James*); "Women [have] greater irritability (or, as it is perhaps better called, affectability), men deeper *sensibility*" (*Havelock Ellis*); "She had . . . wounded the *sensibilities* of the footmen" (*Thackeray*); "Tact, after all, is only a *sensitiveness* of nerve" (*Lowell*); "Propose to yourself the necessity . . . of not being unduly affected or hurt at what they say or do. *Sensitiveness* is a weakness most paralyzing . . . to the mind" (*Jowett*); "that proud, narrow *sensitiveness* . . . which quivers threadlike in small currents of self-preoccupation" (*G. Eliot*). SUSCEPTIBILITY, though often equivalent to *sensibility,* commonly emphasizes more strongly quickness of response to impressions from without; as, "He would not allow her to read to him, . . . alleging nervous *susceptibility* to sounds and movements" (*G. Eliot*); "The poetic faculty always has for its basis a peculiar temperament, an extraordinary delicacy of organization, and *susceptibility* to impressions" (*M. Arnold*). Cf. FEELING, SENSIBLE, INSENSIBLE.
— ***in a sense.*** **a** According to an interpretation other than the one natural or obvious; hence, after some fashion; as, that is true, *in a sense.* **b** To a (specified) effect. — ***one's senses.*** One's sane and normal exercise of mental faculties; as, in his right *senses;* scared out of his *senses.* — ***the sense.*** That sense which is contextually implied. *Archaic.* — ***the senses.*** The realm of perception and sensation.

sensitive drill. *Mach.* A drilling machine that responds to delicate adjustments.

sensitive fern. A North American fern (*Onoclea sensibilis*) the leaves of which, when plucked, show a slight tendency to fold together. It is also sensitive to early frosts.

sensitive film. *Photog.* = FILM, 5.

sensitive flame. *Physics.* A gas flame so arranged that under a suitable adjustment of pressure it is exceedingly sensitive to sounds, being caused to roar, flare, or become suddenly shortened or extinguished, by slight sounds of the proper pitch.

sensitive frog. *Veter.* The plantar cushion.

sensitive herb. The sensitive plant *Mimosa pudica.*

sensitive joint vetch. An annual herb (*Aeschynomene virginica*), of the southeastern United States and tropical America, with sensitive foliage and jointed pods.

sensitive knowledge. See KNOWLEDGE, 4.

sensitive laminae. See LAMINA, 4.

sen'si·tive·ness, *n.* Quality or state of being sensitive.

Syn. — See SENSE.

sensitive paper. Paper prepared for photographic purposes by coating or impregnating it with some substance sensitive to light.

sensitive pea. Any of several herbs, of the genus *Chamaecrista,* having leaflets somewhat sensitive to the touch, esp. the North American *C. fasciculata* and *C. nictitans.*

sensitive plant. **a** A well-known tropical American irritomotile herb (*Mimosa pudica*) often cultivated in greenhouses. It has palmate leaves, the divisions of which are pinnate with many small leaflets. At a touch the leaf-stalk droops, and the pinnae and leaflets close tightly. Also, any of several related species of *Mimosa.* **b** Any plant showing motions after irritation, as the sensitive brier, the sensitive pea, species of *Oxalis,* etc.

sensitive plate. = PLATE, *n.,* 27.

sensitive rose. The sensitive brier *Schrankia uncinata*

sensitive shrub. The sensitive plant *Mimosa pudica.*

sen'si·tiv'i·ty (sĕn'sĭ·tĭv'ĭ·tĭ), *n.; pl.* -TIES (-tĭz). **1.** Quality or state of being sensitive; the rate of displacement of the indicating element with respect to change of the measured quantity; — chiefly in technical use; as, the *sensitivity* of silver iodide, of a galvanometer, etc.

2. *Psychol.* The capacity of an organism or of a sense organ to respond to stimulation; irritability; also, the degree of such responsiveness, measured, inversely, by the weakest stimulus which awakens sensation or other response.

3. *Radio.* The degree to which a receiving set responds to incoming waves; specif., the quotient of the power or other function of output of the set divided by the power or other function of its input.

sen'si·ti·za'tion (-tĭ·zā'shŭn; -tĭ·zā'shŭn), *n.* Act, process, or result, of sensitizing.

sen'si·tize (sĕn'sĭ·tīz), *v.; -TIZED* (-tĭzd); -TIZ'ING (-tĭz'ĭng). *Transitive:* **1.** To make sensitive; to increase the sensitiveness of; as, the study of art *sensitizes* a person in his contacts with beauty.

8. *Gram.* A group of words so related as to convey a completed thought with the force of asserting something or of asking, commanding, exclaiming, or wishing; structurally considered, a group of words forming one or more predications (in the latter case either linked in a series or subordinated one to another) taken as a unit thought; considered as a part of a larger unit of composition, a group of words expressing one completed step in a course of thinking; a unit of speech marked at the close, in writing by a period or other point appropriate to its special form, in speech usually by a full stop and often, before the stop, by an appropriate cadence of the voice. Where such a unit comprises lesser units which form predications in themselves, one of these, called a *clause,* is also sometimes, loosely, called a *sentence.* In inflected speech a single word may unite the sense elements which form a thought, and then ranks as a sentence (Latin *ibam,* I was going), and almost any word (except mere relating particles) may assume the force of a sentence from what is implied in the context or the situation, as in answer or command. According to the forms that distinguish their forces as sense units, sentences are commonly described as *declarative, interrogative, imperative,* and *exclamatory.* According to the degrees of complication in their structure, sentences are described as *simple, complex, compound,* and *compound-complex.*
9. *Law.* In its broadest sense, a judicial determination, judgment, or decree; doom; chiefly: **a** In Civil and admiralty law, the judgment of a court pronounced in a cause. **b** In criminal and ecclesiastical courts, a judgment passed by a court or judge on a person on trial as a criminal or offender; as commonly used, the order by which the court imposes punishment or penalty upon a person found guilty, or the punishment or penalty so imposed.
10. *Music.* A complete musical idea; a period.
11. *Old Rhet.* A sententious or pointed saying; — by translation from Greek *gnōmē.*

1, 2 Forms of Separator, 2 a.

2. One that separates; any of various machines, devices, or apparatus for separating a mixture into its constituent parts. Specif.: **a** A device for drying steam before it enters a steam engine. **b** Any of various apparatus for separating liquids of different specific gravities, esp. one acting by centrifugal force, for separating cream from milk. In the cream separator, the whole milk flows into a bowl driven at high speed by mechanical or hand power. The cream and skim milk are completely separated by centrifugal action, leaving the bowl by suitably placed spouts. A common type of machine effects the separation by a set of rapidly revolving disks or cones, between which the milk passes in a thin layer. The richness of the cream delivered may be regulated by an adjustment of the rate of flow. **c** Any of various machines for freeing wheat from foreign admixtures and dust. **d** A revolving screen or a machine containing a revolving perforated cylinder with beater arms, for separating cottonseed meats from the hulls. **e** Any of various mechanical apparatus for dressing ore, removing slate from coal, etc. **f** An electromagnetic apparatus to separate magnetic ores from rock, sand, etc.

A Typical Cream Separator; *B* Enlarged sectional view of Separator Bowl. 1 Supply Bowl; 2 Faucet regulating supply of whole milk to Separator Bowl (3); 4 Cream Spout; 5 Skim Milk Spout; 6 Pail Shelf; 7 Operating Crank; 8 Conical Disks to separate milk into thin layers.
The whole milk flows into the separator bowl through a central tube (see the descending arrow in *B*). As the bowl revolves, the skim milk is thrown by centrifugal force to the outside of the bowl and then rises to the skim milk spout (see broken arrow line), while the cream, being lighter than the skim milk, remains at the center where it rises to the cream spout (see dotted arrow line).

3. Any of various devices for spacing things, or parts of objects, apart from each other. Specif.: **a** Any of various things used as distance pieces, as a casting for separating the sections of a built-up girder. **b** *Beekeeping.* A thin, fencelike strip of wood or metal placed between sections in the beehive to confine the building of comb to the sections. **c** *Dent.* A mechanical device for separating adjoining teeth to give access to their surfaces. **d** *Elec.* A device for preventing metallic contact between the electrodes of opposite polarity within a voltaic cell. In a lead-lead storage cell, wood or perforated hard-rubber sheets are commonly used.

4. *Spinning.* Either of two guards placed one on each side of a spindle to limit the distance that the yarn flies outward through centrifugal action. *U. S.* In England called *antiballooner.*

5. *Weaving.* A ravel.

sep'a·ra·to'ry (sĕp'ȧ·rȧ·tō'rĭ, *Brit.,* -tĕr·ĭ; 68), *adj.* Serving to separate; used in separating; as, a *separatory* funnel.

2. The important Greek version of the Old Testament still in use in the Eastern Church. See 1st CANON, 3. The Septuagint is so called from the legend preserved in the Letters of Aristeas, that the Pentateuch was translated at Alexandria by seventy-two emissaries from Jerusalem at the request of Ptolemy II (while Arsinoë was queen, 278–270 B.C.). The Church Fathers made the number a round seventy, and extended the tradition to the whole of the Greek Old Testament. The translation may have been begun under Ptolemy II, and was completed about the beginning of the Christian Era. It differs from the Masoretic text chiefly in Samuel, Kings, Proverbs, and in Jeremiah, where it lacks about 2,700 words present in the Hebrew. The Septuagint is the version cited by Philo, Josephus, and in the New Testament. It is usually referred to by the symbol *LXX*.

serf (sûrf), *n.* [F., fr. L. *servus.* See SERVE.] **a** Orig., a slave, as the Anglo-Saxon theow, the lowest of the classes of persons mentioned in the Domesday Book, ranking below the cotarii, or cotters. Hence, later and now usually, a person belonging to any of various grades of persons, esp. in different feudal systems, bound, or adscript, to the soil and more or less subject to the will of the owner of the soil, as the English villein of the 12th or 13th century. The serf could be separated from the lord's land by manumission only. In England, with the gradual merging of the slave class and the lowest peasant classes (cf. COTTER, 2; VILLEIN), *serf* came to be synonymous with *villein.* **b** Later, in the 17th and 18th centuries, any of similar classes of tillers of the soil in other countries, as in Germany, Poland, and esp. Russia, where the serfs were not emancipated until 1861. **c** Loosely, a slave.

Syn. — SERF, SLAVE, THRALL. SERF denotes, strictly, one who is attached to the soil and sold with it into the service of any and every purchaser; a SLAVE is the absolute property of his master, and may be sold at will; THRALL is now chiefly poetical or elevated for *slave.* *Slave* and *thrall* are often used in figurative senses. Cf. SERVITUDE.

sergeant at arms, *pl.* SERGEANTS AT ARMS. **a** *Eng. Feudal Law.* A tenant holding by the sergeanty of service as an armed personal attendant for protection of the lord and enforcement of his commands; such an attendant upon the king, or on the king's lord high steward in court, to arrest traitors and other offenders. The title is preserved for the two officers who, nominally by allowance of the sovereign, attend on the houses of Parliament (one for each house) to execute their commands, and for the officer similarly attending on the Court of Chancery. Hence: **b** An officer of any legislative body, or of a deliberative or judicial assembly, who attends upon it to execute its commands in preserving order, arresting offenders, or the like.
ser'geant-at-law', **ser'jeant-at-law',** *n.; pl.* SERGEANTS-AT-LAW, SERJEANTS-AT-LAW. *Eng. Law.* A barrister of the highest rank, answering to the *doctor* of the Civil law, outranking king's counsel socially, but in professional rank inferior to them. Sergeants had for centuries the exclusive right to be heard in the Court of Common Pleas until that privilege was taken away, chiefly by 9 & 10 Vict. c. 54 (1846). Until the Judicature Acts of 1873, they alone could be justices of the Supreme Court. The order is now extinct in England. See *Forms of Address,* in Appendix; PRECEDENCE.

ser'geant-y, **ser'jeant-y** (-ĭ), *n.* [OF. *sergentie, serjantie.*] *Eng. Feudal Law.* Any of a great variety of feudal services of a more or less personal or menial (household) nature, by which estates were held of the king or other lord; also, the tenure by which land was so held, or a piece of land held by such tenure. The tenure of sergeanty was distinct from the knight's, or military, tenure (though it might involve service in war) and from socage tenure. The nature of the service varied greatly with different holdings, common forms being service as the lord's steward, marshal, constable, chamberlain, esquire or attendant in war, etc. Sergeanties were early divided into *grand* and *petty,* the distinction originally depending on pecuniary value, ***grand sergeanty*** giving the lord the rights of wardship and marriage. Later ***grand sergeanty*** required some special personal service to the king (as the carrying of his banner, his sword at coronation, serving as his marshal, or the like), and ***petty sergeanty*** the rendering annually of some implement of war, as a bow, arrow, sword, flag, etc.

se'ro- (sē'rō-), **ser-.** A combining form used to indicate *connection with,* or *relation to, serum,* as in *sero*diagnosis, *ser*albumin. It denotes also in adjectives *serous and,* as in *sero*fibrinous. For words below, see the word or element with which *sero-* is combined:

seroalbumin	serohemorrhagic	seroprognosis
seroalbuminuria	serohepatitis	seroprophylaxis
seroanaphylaxis	seroimmunity	seroprotease
serobiological	serolactescent	seropuriform
serocolitis	serolipase	seropurulent
serocyst	seromaniac	seropus
serocystic	seromembranous	seroreaction
serodermatosis	seromucous	serosanguineous
serodermitis	seromuscular	serosanguinolent
seroenteritis	seroperitoneum	seroscopy
seroenzyme	serophthisis	serosynovial
serofibrinous	serophysiology	serosynovitis
serofibrous	seroplastic	serotherapist
serofluid	seropneumothorax	serotherapy
serogelatinous	seroprevention	serotoxin

se'ro·di'ag·no'sis (sē'rō·dī'ăg·nō'sĭs), *n.* [NL., fr. *sero-* + *diagnosis.*] *Med.* Diagnosis by the use of serum, as in the Wassermann and Widal's tests. Serum from a patient may be tested for its behavior with a known germ, or a germ isolated from a patient may be tested against serum from a patient with a known disease. — **se'ro·di'ag·nos'tic** (-nŏs'tĭk), *adj.*

se'ro·lem'ma (-lĕm'ȧ), *n.* [NL., fr. *sero-* + *-lemma.*] *Embryol.* The outer cell layer from which the false amnion is developed in vertebrates.

8. *Law.* A right in respect of an object, usually land owned by one person in virtue of which the object is subject to a certain use or enjoyment by another person or for the benefit of another thing, as in the case of the common-law easement (which is a species of servitude). A servitude is ***affirmative*** when it permits an otherwise unpermitted act by the owner of it; ***negative*** when it imposes on the owner of the servient tenement forbearance of an otherwise permissible action. *Servitude* is esp. common in the Roman and Civil law, and is defined in the Pandects (934) as "a right in virtue of which the thing of another renders service to a person or thing." In Roman law servitudes were classified as: **a** ***Personal servitudes,*** including usufruct, (mere) use (see USUFRUCT and USE), and habitation, or ***habitatio,*** right of residing in a house. **b** ***Praedial,*** or ***real, servitudes,*** or rights over land (called ***praedium,*** or ***res, serviens***) vested in a person by virtue of his ownership of other land (called ***praedium,*** or ***res, dominans***), and including ***rural,*** or ***rustic servitudes,*** affecting chiefly or only the soil; and ***urban servitudes,*** affecting chiefly or solely a building or buildings on land. The more important rural servitudes were: ***actus*** a right of way for a carriage or cattle; ***via,*** a right of way in general; ***aquaeductus,*** *Civil Law,* the right to lead or conduct water over the land of another; ***aquaehaustus*** or simply, ***haustus,*** *Civil Law,* the right to draw water from a well, spring, or stream, on another's land; and ***jus pascendi,*** right of pasture. The chief urban servitudes were: ***altius non tollendi,*** right to have another not build higher (than a certain limit); ***ne luminibus officiatur,*** right to have the windows not shut off from light; ***stillicidii recipiendi,*** right of receiving the drip from a neighbor's roof; and ***aquae immittendae,*** right to throw water from one's windows on a neighbor's buildings or soil. The Civil law as to servitudes is essentially the same as the Roman law, but the Civil law includes under this head a rent charge.

Syn. — SERVITUDE, SLAVERY, BONDAGE. SERVITUDE may apply to either voluntary or (more frequently) compulsory subjection to a master; SLAVERY and BONDAGE (the stronger term) imply absolute and enforced subjugation to another's will. Cf. SERF, MENIAL, PRISONER.

Ant. — Freedom, liberty, independence; dominance, supremacy; nobility.

4. *Law.* The discharge of a debt by setting against it a distinct claim in favor of the debtor; also, the claim itself. In English law setoff originated in equity practice, but the Act of 2 Geo. II, c. 22, introduced it in the common-law courts, and its provisions have been generally re-enacted in the United States. In most jurisdictions, as at common law, setoff can be had only on a liquidated claim between the same parties in the same capacities, and must be pleaded and answered with the same formality as in an independent action. A setoff may give rise to a judgment in favor of the original defendant. In the common law the debts do not extinguish each other until judgment is had to that effect, but in the civil-law systems generally, as the French and Roman Dutch, the opposing debts extinguish each other ratably by operation of law. *Setoff* differs from *recoupment*, as the latter generally grows out of the same matter or contract with the plaintiff's claim. sewing cotton. Hard twisted cotton thread used in sewing.

sewing machine. Any of numerous machines for sewing or stitching. The double-pointed needle, the fundamental principle of a sewing machine, was first invented by Charles F. Weisenthal (1755). The first sewing machine was probably that of Thomas Saint, who patented in England (1790) a machine for stitching. The first machine put to practical use was invented by Barthélemy Thimonnier, patented in France in 1830. The eye-pointed needle and double lock stitch were invented by Walter Hunt of New York about 1832 but never patented. Elias Howe of Spencer, Mass., developed his machine independently, patenting it in 1846. It embodies most of the principles of the modern machine, including those of Hunt's of whose work Howe seemed unaware when constructing his machine. See CHAIN STITCH, LOCK STITCH, SHUTTLE, etc. — **sew'ing–ma·chine',** *adj.*

sewing press. *Bookbinding.* A wooden device, used as on a table, having a baseboard and two screw-threaded uprights supporting a crossbar held in position by two wooden nuts. sex (sĕks), *n.* [F. *sexe,* fr. L. *sexus;* prob. orig., division, and akin to L. *secare* to cut. See SECTION.] **1.** One of the two divisions of organisms formed on the distinction of male and female; males or females collectively.
2. The sum of the peculiarities of structure and function that distinguish a male from a female organism; the character of being male or female, or of pertaining to the distinctive function of the male or female in reproduction. *Conjugation,* or *fertilization* (union of germ plasm of two individuals), a process evidently of great but not readily explainable importance in the perpetuation of most organisms, seems to be the function of differentiation of sex, which occurs in nearly all organisms at least at some stage in their life history. Sex is manifested in the conjugating cells by the larger size, abundant food material, and immobility of the female gamete (*egg, egg cell,* or *ovum*), and the small size and the locomotive power of the male gamete (*spermatozoon* or *spermatozoid*), and in the adult organisms often by many structural, physiological, and (in higher forms) psychological characters, aside from the necessary modification of the reproductive apparatus. Cf. HERMAPHRODITE, 1. In botany the term *sex* is often extended to the distinguishing peculiarities of staminate and pistillate flowers, and hence in dioecious plants to the individuals bearing them.

In many animals and plants the body and germ cells have been shown to contain one or more chromosomes of a special kind (called *sex chromosomes; idiochromosomes; accessory chromosomes*) in addition to the ordinary paired autosomes. These special chromosomes serve to determine sex. In the simplest case, the male germ cells are of two types, one with and one without a single extra chromosome (*X chromosome,* or *monosome*). The egg cells in this case all possess an X *chromosome,* and on fertilization by the two types of sperm, male and female zygotes result, of respective constitution *X,* and *XX.* In many other animals and plants (probably including man) the male organism produces two types of gametes, one possessing an *X chromosome,* the other a *Y chromosome,* these being visibly different members of a pair of chromosomes present in the diploid state. In this case also, the female organism is *XX,* the eggs *X,* and the zygotes respectively male (*XY*) and female (*XX*). In another type of sex determination, as in certain moths and possibly in the fowl, the female produces two kinds of eggs, the male only one kind of sperm. Each type of egg contains one member of a pair of differentiated chromosomes, called respectively *Z chromosomes* and *W chromosomes,* while all the sperm cells contain a *Z* chromosome. In fertilization, union of a *Z* with a *W* gives rise to a female, while union of two *Z* chromosomes produces a male. Cf. SECONDARY SEX CHARACTER.
3. a The sphere of behavior dominated by the relations between male and female. **b** *Psychoanalysis.* By extension, the whole sphere of behavior related even indirectly to the sexual functions and embracing all affectionate and pleasure-seeking conduct.
4. Phenomena of sexual instincts and their manifestations.
5. Sect; — a confused use.

Syn. — SEX, GENDER. SEX refers to physiological distinctions; GENDER, to distinctions in grammar.
— ***the sex.*** The female sex; women, in general.

shale spirit. = SHALE NAPHTHA (see NAPHTHA, 3).

shall (shăl; 71), *v.*; *pres., sing.,* 1st & 3d person SHALL, 2d SHALT, *pl.* SHALL; *past tense* SHOULD. Infinitive and participles lacking. [ME. *shal, schal,* pret. *sholde, scholde,* fr. AS. *scal, sceal,* I am obliged (orig. a pret. ind.), pret. *scolde, sceolde,* inf. *sculan;* akin to OS. *skulan,* pres. *skal,* pret. *skolda,* D. *zullen,* pres. *zal,* pret. *zoude, zou,* OHG. *solan, scolan,* pres. *scal, sol,* pret. *scolta, solta,* G. *sollen,* pres. *soll,* pret. *sollte,* ON. *skulu,* pres. *skal,* pret. *skyldi,* Sw. *skola,* pres. *skall,* pret. *skulle,* Dan. *skulle,* pres. *skal,* pret. *skulde,* Goth. *skulan,* pres. *skal,* pret. *skulda,* and to AS. *scyld* guilt, G. *schuld* guilt, fault, debt, Lith. *skola* debt.] **1.** [*v. i.*] Owe; be under obligation for. *Obs.*

By the faith I *shall* to God. *Court of Love.*

2. As an auxiliary verb, followed by the infinitive without *to:* **a** Am (is, are, etc.) obliged; must. Hence, am (is, are, etc.) to; — forming future-tense phrases. See also SHOULD. *Shall* and *will* are both used as future auxiliaries, the choice between them arising from their respective special implications of necessity and intention. Thus *shall,* when used in the 2d or 3d person, has a special force from the fact that the speaker predicts or promises another's action, and hence is expressive of some authority or compulsion on the speaker's part; as in, you *shall* go; thou *shalt* not kill; he *shall* rue it. In the 1st person *shall* now usually expresses mere futurity (as in, I *shall* be glad to see you; we *shall* go), although by emphasis or context it may take on the weightier sense of necessitation, determination, or destiny; as in, I *shall* suffer; we *shall* see. *Will,* on the other hand, when used in the 1st person, has more often its primary force of *volition* or *willingness;* as in, I *will* go; that is, I am willing, or, emphatically, I am determined, to go. In the 2d and 3d person the idea of volition is weakened or lost, the speaker not readily being thought of as asserting an intention in another's mind. Hence in you *will* go, they *will* go, *will* denotes simple futurity, though again the futurity may be emphasized as certain. In a question the form preferably used is that expected in the answer; thus, *shall* I? *shall* he? *will* he? *Will* I? is rarely proper, as implying that the questioner asks for his own intention. The context and the expressive intention of the writer may, of course, often set aside the application of the grammarians' rules here given. In commands, also, *will* is often used by way of courtesy; as in, you *will* report to the colonel. In conditional, temporal, and concessive clauses *shall* is the proper auxiliary for simple futurity in all three persons, when the subject is the same as that of the principal verb.

☞ *Shall* and *will* may be used elliptically when the principal verb is easily supplied from the context, esp. for *shall* or *will go.* "I'*ll* to her lodgings." *Marlowe.*

He to England *shall* along with you. *Shak.*

b *Obs.* (1) Ought. (2) Will be able to.

shall (shăl), *n.* The auxiliary verb *shall* used in expressing a promise, command, or the like; such a promise or command.

shark (shärk), *n.* [Prob. named from its rapacity and fr. SHARK a sharper.] Any of numerous elasmobranch fishes which conform more or less nearly to the ordinary fishes in the fusiform (not flattened) shape of the body and lateral position of the gill clefts, as distinguished from the greatly flattened rays and the grotesquely shaped chimaeras (see 3d RAY, HOLOCEPHALI), and sometimes also (in a narrow sense) from some of the more primitive extinct elasmobranchs. The sharks are mostly marine and, though widely distributed, most abundant in warm seas. They are usually of medium or large size, the largest existing fishes (30 to 40 feet long) being of this group. Still larger extinct sharks are known. They have a tough, usually dull-gray, sometimes conspicuously spotted, skin, which is roughened by minute tubercles. The tail is strongly heterocercal and the snout is produced beyond the mouth, which generally has formidable teeth. Though some feed chiefly on shellfish, most are very active, voracious, and destructive of other fishes, and the larger ones are often dangerous to man. Their flesh is coarse. Oil is obtained from the liver of many species and the skins are to some extent made into leather. Among the more important kinds are the basking shark, blue shark, hammerhead, man-eater, porbeagle, and the dogfishes. See these terms; also ELASMOBRANCHII, SELACHII.

Syn. — Pointed, edged; poignant, tart, acrid, harsh; bitter, acrimonious, sarcastic, caustic; alert, discerning, sagacious, astute. — SHARP, KEEN ACUTE, CUTTING, TRENCHANT, INCISIVE, CRISP. As used of things, SHARP (the common word) applies to either an edge or a point; KEEN (now somewhat rhetorical), esp. to an edge, rarely to a point; ACUTE (commonly more or less technical) applies to a point regarded as angular, but not to an edge; as, *sharp* (or *keen*) as a razor; *sharp* (not *keen*) as a needle; an *acute* leaf. As applied to that which affects the senses, SHARP is of much wider application than KEEN, which is chiefly used of cold, wind, etc.; ACUTE, in this application is rare; as, *sharp* as vinegar, a *sharp* voice, a *sharp* flash, a *sharp* (or *keen*) wind. As applied to the senses themselves, SHARP is used esp. of sight and hearing, KEEN, of sight and smell, ACUTE, of hearing; as, *sharp*-sighted; *keen*-sighted; *sharp* ears; his hearing was still *acute;* dogs *keen* of scent. As characterizing pleasures and pains, SHARP suggests most definitely that which cuts or pierces, KEEN implies intensity, ACUTE, poignancy; as, a *sharp* pain; *keen* zest, *acute* anguish. With reference to persons or personal qualities, SHARP often implies overcleverness or trickiness, KEEN suggests shrewdness or quickness, ACUTE, penetration or nicety of discrimination; as, *sharp* practice; a *sharp* customer; a *keen* intellect, "his *keen*, worldly face" (*Dr. J. Brown*); "He is . . . rather . . . an *acute* thinker than a subtle one" (*De Quincey*); "His criticisms are always sensible, never *acute*" (*Landor*). *Sharp* comes into comparison with *cutting, trenchant, incisive,* and *crisp* with reference to language. SHARP implies esp. acrimony or sarcasm; that is CUTTING which is designed to wound the feelings; as, a *sharp* retort; a *sharp* rebuke; "Eloquence, smooth and *cutting*, is like a razor whetted with oil" (*Swift*); "[He] ridiculed [her] . . . with all the *cutting* words that his wit could find" (*Trollope*). TRENCHANT implies sharp definition or forthright energy; INCISIVE, clean-cut directness; CRISP, terse or racy vigor; as, "The right word, bold and *trenchant*, is thrust into its place" (*Stevenson*); "When roused by indignation or moral enthusiasm, how *trenchant* are our reflections!" (*W. James*); *incisive* commands; an *incisive* tone; "There was about [him] . . . a something hard and crystalline, a positiveness, an *incisiveness* of view" (*M. Hewlett*); "compact in form, *crisp* and nervous in style" (*Trevelyan*); "the blithe, *crisp* sentence, decisive as a child's expression of its needs" (*W. Pater*). Cf. PUNGENT, MORDANT, CONCISE.

The possessive *her* or *hers* and the objective *her,* are from a different stem. Cf. HE.] **1.** This or that female; the woman understood or referred to; the female animal, or object personified as feminine, in question; — the pronoun of the 3d person sing. feminine.

She loved her children best in every wise. *Chaucer.*

☞ The early use of *she* as applied to things grammatically feminine without personification survives in connection esp. with boats, vehicles, the moon and planets, and familiar tools, as well as in dialect use of *she* for certain birds and animals, as the cat and hare. In the old ballad style, and in present dialect and illiterate speech, *she* is used redundantly with its noun; as, "His mither *she* cam." Other dial. uses are: (1) Emphatically for *her.* (2) Designating a wife or the mother of a household without previous reference.

☞ Use of *she* to replace, instead of merely refer to, a person's name is generally considered impolite.

☞ *Her* is sometimes represented as used by Welsh or Gaelic speakers for *he, him,* or as referring to the speaker himself.

She. — Spurious Highland dialect, representing *I, you, he, they,* and even *Highlander,* for which *she, her, hernanesell* have become a nickname. (The Gaelic having no word for the neuter *it,* the masc. *e* and fem. *i* do duty for the absent form. *i* in some Highland districts is largely used in speaking of sexless objects.)
Child's Ballads, Glossary.

2. That particular woman; — used indefinitely and followed usually by a relative pronoun; as, *she* that is coming; sometimes by a defining prepositional phrase; as, *she* of the golden hair.

shell (shĕl), *n.; pl.* SHELLS (shĕlz) or, in sense 32, usually collectively, SHELL. [ME. *shelle*, fr. AS. *scell, sciell, scyll;* akin to D. *schel*, ON. *skel* a sea shell, Goth. *skalja* a tile, OSlav. *skolĭka* a mussel shell, Lith. *skala* a splinter of wood, Gr. *skallein* to hoe, dig; basic idea: to split, to cleave. See SCALE, SHALE, SHELF, SHIELD, SKILL; cf. COLTER, SKULL.] **1. a** A hard rigid covering of an animal, commonly largely calcareous, in other cases chiefly or partly chitinous, horny, or even siliceous. The shell of a mollusk consists of one or more calcareous pieces secreted by a modified portion of the surface of the body called the *mantle*, and in typical cases is large enough to cover the animal, but it may be reduced or rudimentary and buried in the soft tissues. A mollusk's shell is enlarged by the deposition of new material, esp. around the edges, to provide for the animal's growth. The shell of a crustacean is the outer chitinous cuticle, often stiffened with calcareous matter. It is molted at intervals to provide for growth, the soft underlying cuticle hardening into a new shell. In the vertebrates having a shell, it is composed of bony plates often covered with horny epidermal shields. **b** The hard or tough outer covering of an egg, esp. a bird's egg. **c** *Obs.* A scale of a fish or reptile.

3. In general, any vessel intended or used for navigation, or such a vessel not of the kind propelled by oars, paddles, or the like; a water craft or vessel. In popular usage, and more esp. in various legal uses, the term *ship* has a very broad meaning, varying more or less with the context in which it is used. Thus in various matters of maritime and international law, as with reference to salvage, *ship* may mean: any vessel used for purposes of navigation; any locomotive machine or structure intended or used for transportation on rivers, seas, oceans, or other navigable waters, without regard to its form or means of locomotion; any structure or vessel fitted for navigation. For the purposes of some statutes it has even a broader definition, as in the English Foreign Enlistment Act, where it is defined as including "any description of boat, vessel, floating battery, or floating craft; also, any description of boat, vessel, or other craft or battery, made to move either on the surface of or under water, or sometimes on the surface of, and sometimes under, water" (33 & 34 Vict. c. 90, s. 30). For definitions of principal classes of sailing vessels, other than *ship* (in the specific sense), see 5th BARK, BARKENTINE, BRIG, BRIGANTINE, DAHABEAH, DHOW, FRIGATE, GALLEON, 2d JUNK, 2d KETCH, LUGGER, SAMPAN, 1st SCHOONER, SLOOP, YAWL, etc. For definitions of classes of war vessels see NAVY, **2.** Merchant steamships are generally classified according to their motive power, peculiarities of construction, etc. See TURBINE, WHALEBACK, etc. In personifications, *ship* is now feminine.

Syn. — Clever, discerning, acute, sharp, penetrating, artful, cunning. — SHREWD, SAGACIOUS, SAGE, SAPIENT, PERSPICACIOUS, ASTUTE, SUBTLE, KNOWING. SHREWD implies native cleverness, or sharpness of wit or judgment, in practical affairs; SAGACIOUS, a word of more dignity, retains the implied contrast with deep wisdom or mere learning, but often suggests greater discernment or more farsighted judgment than *shrewd;* as, "[He] is . . . sensible and *shrewd,* with a considerable fund of humor" (*Smollett*); "the *shrewd* wisdom of an unlettered old woman" (*W. Pater*); "a *shrewd* bargain" (*Stevenson*); "the kindly, earnest, brave, foreseeing man, *sagacious,* patient, dreading praise, not blame" (*Lowell*); "He does not . . . with all his wisdom have *sagacity* enough to see [what] it contains" (*Cowper*); "If they have not the same fund of acquired knowledge, [they] are obliged to rely more on individual *sagacity*" (*Hazlitt*). SAGE often connotes age or deep wisdom; as, "Vane, young in years, but in *sage* counsel old" (*Milton*); "One must distinguish Keats, Shelley, and Byron from the great *sage* poets of all . . . like Aeschylus, Shakespeare, Dante, and Goethe" (*Tennyson*). SAPIENT, in present usage, is commonly ironical; as, "a *sapient,* instructed, shrewdly ascertaining ignorance" (*W. Pater*). PERSPICACIOUS implies acute discernment; ASTUTE, opprobriously used, heightens the suggestion, often present in *perspicacious,* of artfulness, diplomacy, or craft. It may connote merely shrewd discernment and sagacity; as, "It [conscience] is altogether as nice, delicate, and tender in feeling, as it can be *perspicacious* and quick in seeing" (*South*); "keen philosophic *perspicacity*" (*Carlyle*); "the true innkeeper's *perspicacity* — a sort of happy medium between the instinct of the detective, the cunning of the spy, and the craft of the trader" (*G. B. Ives*); "Savages . . . are often as . . . *astute* socially as trained diplomatists" (*W. James*); "The victim of *astuter* sharpers" (*Thackeray*). SUBTLE implies delicate and penetrating discernment; it often suggests excessive refinement or nicety; as, "the acute and *subtle* Cotton, . . . quick in the nice perception of distinctions, and pliant in dialectics" (*Bancroft*); "a *subtle* lynx-eyed intellect" (*Carlyle*); "He is a little too *subtle* and analytical, too ingenious and finespun" (*Mrs. Humphry Ward*). KNOWING suggests either sophisticated shrewdness or an air of possessing knowledge which one is keeping to oneself; as, "It is only in the hulks . . . that you ever see a face so mean, so *knowing*" (*Thackeray*); "I don't quite like this chit. She looks *knowing*" (*Goldsmith*). Cf. WISE, CUNNING, DISCERNMENT.

Syn. — Retiring, shrinking, shamefaced, sheepish, unobtrusive, unassuming, unostentatious, demure. — SHY, BASHFUL, DIFFIDENT, MODEST, COY agree in the idea of sensitiveness to the notice or society of others. SHY implies a shrinking, whether constitutional or the result of inexperience, from familiarity or contact with others; shyness usually manifests itself in a certain reserve of manner; BASHFUL implies an instinctive or constitutional shrinking from public notice, usually expressing itself in greater or less awkwardness of demeanor, and primarily characteristic of childhood; as applied to mature persons, it connotes abnormal or excessive shyness; as, "He is a sweet lad, but as *shy* as a bird" (*Cowper*); "that *shyness* or principle of reserve which is inseparable from self-respect" (*De Quincey*); "I have a *shyness* of disposition, which looks like pride, but is not" (*Scott*); "What a curious thing *shyness* is, . . . never knowing what to say, and yet sometimes pouring out its feeling like a flood" (*Jowett*); "My sudden appearance frightened [the children] into *bashfulness.* They remained for a moment playing on their lips with their fingers, and now and then stealing a *shy* glance from under their eyebrows" (*Irving*). DIFFIDENT implies a distrust, which may or may not be warranted, of one's own ability, opinion, or powers; it gives rise to hesitation in their exercise; MODEST, without implying (like *diffident*) self-distrust, denotes an absence of all undue confidence in oneself or one's powers; as, "She was always quick and assured; Isabella slow and *diffident*" (*Jane Austen*); "Unfeigned *diffidence* of my own comparative talent" (*Coleridge*); "The *modest* men who are by *diffidence* restrained from such an enterprise" (*Cowper*); "I still shrunk from the press with the terrors of virgin *modesty*" (*Gibbon*). COY suggests assumed or affected shyness, often with the further implication of coquetry; as, "T is but a kiss I beg; why art thou *coy?*" (*Shak.*); "so near and yet so far — so willing and yet so *coy*" (*Frederick Harrison*); "the *coy* reticences . . . of little people" (*A. Dobson*). Cf. EMBARRASS.

2. *Chem.* In a molecule, a branch "chain" of atoms attached to the principal chain, or to a ring.
— **side'-chain'**, *adj.*

side'-chain' the'o·ry. *Immunol.* A theory proposed by Ehrlich as a chemical explanation of immunity phenomena. In brief outline it is as follows: Animal cells and bacteria are complex aggregations of molecules, which are themselves complex. Complex molecules react with one another through certain of their side chains, but only when these side chains have a definite correspondence in structure (this accounts for the specific action of antitoxins). A ***receptor*** is an outlying part of the cell which is able to combine, by means of a so-called ***haptophorous*** group, with foreign molecules, as with a food molecule (thus helping to nourish the cell) or with a toxin molecule. Such combination stimulates the cell to produce other receptors and may at last result in overproduction, the superfluous receptors becoming detached from the cell. The so-called ***immune bodies*** formed in immunizing processes are detached receptors and are called also ***intermediary bodies***, or ***amboceptors***, because they have two haptophorous groups and act as links to bind invading cells to the ***complements*** (also called ***addiments***, ***alexins***, ***cytases***) which are normally present and which when so united to the foreign cells are able to destroy them by means of a ***zymotoxic group*** or ***toxophore group***. The amboceptor with its complement constitutes a ***cytotoxin***, ***hemolysin***, or ***bacteriolysin***. Other detached receptors act as ***antitoxins***, as ***agglutinins***, or as ***precipitins***. Toxins have a ***haptophorous*** group (by which they combine with antitoxins) and a ***toxophorous*** group to which their injurious effects are due. A toxin which has lost its toxophorous group, as by heating, is called a ***toxoid***. Similarly, a ***complementoid*** is a complement which has lost its zymotoxic group, and an ***amboceptoid*** is an amboceptor which has lost one of its haptophorous groups. The presence of a foreign cytotoxin leads to the production of an ***anticytotoxin***, which may act on the amboceptor (***antiamboceptor***) or on the complement (***anticomplement***).
☞ This theory has been seriously questioned in many respects although it still retains an influence in the discussion of immunity.

side chair. A chair, esp. a dining-room chair, without arms.

side chapel. In a church, a small chapel (sense 2 **b**) at the side or in back of the choir or chancel, dedicated, usually, to a saint. Cf. LADY CHAPEL.

Sieg'fried (sēg'frēd; *G.* zēk'frēt), *n.* [G.] 1. The hero of various German legends, particularly of the Nibelungenlied. Brought up in the forest by the demonic smith Mimir, in his youth he accomplished wonderful deeds, winning the hoard of the Nibelungs, the sword Balmung and the Tarnkappe (a cap or cloak that renders the wearer invisible), slaying a dragon and making himself invulnerable by bathing in its blood. He aids Gunther to win Brunhild, and himself weds the beautiful Kriemhild, Gunther's sister. He is treacherously killed by the fierce Hagen, who learns from Kriemhild the secret that Siegfried is vulnerable between his shoulders, and later gets the hoard, which he buries in the Rhine. Siegfried is the hero of two operas in Wagner's *Ring of the Nibelung.* Wagner makes Siegfried a son of Siegmund, and has him release from enchantment and wed the Valkyrie Brünnhilde previous to his falling in love with Gutrune (cf. SIGURD). See BRUNHILD, BRÜNNHILDE, GUNTHER, GUTRUNE, HAGEN, KRIEMHILD, NIBELUNGS.

12. *Astron.* A division of the ecliptic or zodiac. The twelve *signs* are reckoned eastward from the point of intersection of ecliptic and equator (at first point ♈ Aries), in the order given below. Their names were originally the names of the constellations occupying severally the divisions of the zodiac; but, by precession of the equinoxes, the signs have separated about 30 degrees from these constellations, and each of the latter now lies in the sign next in advance, or to the east, of the one bearing its name, as the constellation Aries in the sign Taurus, etc. See also ZODIAC.

No.	Name & Symbol	Sun enters	No.	Name & Symbol	Sun enters
1	**Aries,** Ram	♈ Mar. 21	8	**Scorpio,** Scorpion	♏ Oct. 24
2	**Taurus,** Bull	♉ Apr. 20	9	**Sagittarius,** Archer	♐ Nov. 22
3	**Gemini,** Twins	♊ May 21	10	**Capricornus,** Goat	♑ Dec. 22
4	**Cancer,** Crab	♋ June 22	11	**Aquarius,** Water Bearer	♒ Jan. 20
5	**Leo,** Lion	♌ July 23	12	**Pisces,** Fishes	♓ Feb. 19
6	**Virgo,** Virgin	♍ Aug. 23			
7	**Libra,** Balance	♎ Sept. 23			

In the old astronomy and in astrology, signs were variously classified. A sign was described according to: the triplicity in which it is found (***airy, earthy, fiery, watery***); its location with reference to the equator (***northern, southern***), to the equinox (***equinoctial***), or to the tropics (***tropical***); its numbering, whether even or odd (***diurnal, nocturnal***); its complexion (***hot, cold, moist, dry***); the form of its figure (***bestial, human, bicorporal***); the quality of its influence (***masculine*** or ***feminine, fortunate*** or ***unfortunate,*** etc.).

si′lent (sī′lĕnt), *adj.* [L. *silens, -entis,* pres. part. of *silere* to be silent; akin to Goth. *ana-silan.* See SITE.] **1.** Making no utterance: **a** Speechless; mute. **b** Indisposed to talk; taciturn; not loquacious. **2.** Free from sound or noise; making no sound or noise; perfectly quiet; still; as, a *silent* room; the wind is *silent.* **3.** Performed or borne without utterance; unuttered; unspoken; unexpressed; as, *silent* prayer or rites; *silent* grief, amazement, or agony. **4.** Making no mention; uncommunicative; as, history is *silent* as to this; also, unmentioned; unrecorded. **5.** Performed without sound; as, the *silent* drama; a *silent* film. **6.** Maintaining a state of inactivity; as, a *silent* volcano. **7.** Flavorless; flat; — said of spirit, esp. rectified spirit used in the arts, in making factitious brandy, etc. **8.** *Med.* Not revealing its presence by symptoms or any of the usual signs, said of a morbid condition or product, as an unsuspected cavity in a lung or a gallstone causing no symptoms. **9.** *Physiol.* Unresponsive; yielding no observable response to stimulation; — said of certain areas in the brain.

Syn. — SILENT, TACITURN, RETICENT, RESERVED. SILENT, as here compared (see NOISELESS), may imply either a transient state or a characterizing quality; TACITURN suggests habitual disinclination to speech; as, "We paused . . . and . . . hand in hand, sat *silent*" (*Tennyson*); "Genoa, where men were brave and *silent* and maidens frank like the sea" (*M. Hewlett*); "a man rather *taciturn* in speech, *silent* when there was nothing to be said, but pertinent, wise, sincere when he did speak" (*Carlyle*); "The secrets of nature have not more gift in *taciturnity*" (*Shak.*). One is RETICENT who is disposed to keep one's own counsel; RESERVED often adds to *reticent* the implication of coldness or restraint of manner; as, "He was new, and therefore immediately aroused her curiosity; he was *reticent,* and kept it awake" (*Stevenson*); "the power of holding one's tongue, which is called *reticence*" (*Jowett*); a *reserved* and distant demeanor; cf. "wrapping a cloak of *reserve* about my internal hopes and aims" (*J. A. Symonds*); "that delicate and honorable *reserve* which, for the most part, restrains us from the public exposure of our own errors and infirmities" (*De Quincey*). See STILL; cf. DUMB, SHY.

Ant. — Voluble, loquacious, boisterous; noisy, clamorous.

si′lent (sī′lĕnt), *n.* **1.** A time of silence. *Shak.* **2.** A motion picture without spoken dialogue. **3.** *Elec.* A switch for cutting out an alarm by a short circuit without interfering with other alarms on the same circuit.

silent area. *Anat. & Physiol.* An association area of the cerebral cortex. See AREA, *n.,* **7.**

silent cop. = SILENT POLICEMAN.

silent discharge. *Elec.* A discharge accompanied by little or no noise, as the brush discharge. See DISCHARGE, *n.,* 12 a.

si·len′tial (sĭ-lĕn′shȧl), *adj.* [L. *silentium* silence.] Pertaining to or conducted in silence.

si·len′ti·ar′y (sĭ-lĕn′shĭ-ĕr′ĭ *or, esp. Brit.,* -ĕr-ĭ), *n.; pl.* -IES (-IZ). [LL. *silentiarius.* See SILENCE.] **1.** One appointed to keep silence and order, as in a court of law or a public assembly. **2.** An advocate of silence, esp. as a religious observance. **3.** One sworn not to divulge secrets of state; a kind of state officer or privy councilor; — used esp. of certain court officials of the later Roman Empire. *Hist.* "Served ten years a *silentiary* of the Byzantine palace." *Gibbon.*

si·len′tious (sĭ-lĕn′shŭs), *adj.* [L. *silentiosus;* cf. F. *silencieux.*] Habitually silent; taciturn; reticent. *Rare.*

‖**si·len′ti·um** (sĭ-lĕn′shĭ-ŭm), *n.* [L.] Silence; hence, a room, as in a library, where silence is imposed.

‖**si·len′ti·um al′tum** (ăl′tŭm). [L.] Deep silence.

‖**si′lent le′ges in′ter ar′ma** (sī′lĕnt lē′jēz ĭn′tĕr är′mȧ). [L.] The laws are silent in time of war. Adapted from *Cicero* (*Milo.* IV. 10).

silent partner. See PARTNER, **5.**

silent policeman. Also, *Slang,* **silent cop.** A device, usually equipped with lights and signs, placed at the center of crossroads to replace an officer directing traffic.

silent reading. Reading, esp. as an educational activity, without oral expression.

Silent Sister. The University of Dublin, or Trinity College; — so called on account of its literary unproductiveness at one period. *Obs.*

silent system. A system of penal discipline which forbids conversation among prisoners.

silent vote. The vote of those whose choice is not publicly known. — **silent voter.**

si·le′nus (sĭ-lē′nŭs), *n.; pl.* -NI (-nī). Also **sei·le′nos** (sĭ-lē′nŏs); *pl.* SEILENOI (-noi). [L. *Silenus,* fr. Gr. *Seilēnos.*] *Gr. Myth.* One of a type of minor woodland deities, sometimes not distinguished from the satyrs. Like the satyrs, they are represented as of generally human form, but with a horse's ears and tail and occasionally, with the legs of a horse or goat. When distinguished from satyrs, it is usually as to age, the sileni being old, frequently bald, always bearded, and in the faces more grotesque than those of the younger satyrs. Like the satyrs, they are companions of Dionysus. In myth the principal *silenus* (or Silenus viewed as an individual) is sometimes described as the oldest of the Satyrs, son of Hermes, or of Pan, and fosterer of the infant, and companion of the adult, Bacchus. He is represented as short, stout, bald-headed, with full beard and flat nose, and commonly tipsy. The sileni are probably of Anatolian origin. Cf. CENTAUR, 1, FAUNUS, SATYR, 1, SILVANUS, 2.

si·le′sia (sĭ-lē′zhȧ; -zhĭ′ȧ; -shȧ; -shĭ′ȧ; sĭ′-), *n.* **1.** A linen cloth, originally made in Silesia, a province of Prussia. **2.** A twilled cotton fabric, used for dress linings.

Si·le′sian (-zhăn; -zhĭ′ăn; -shăn; -shĭ′ăn), *adj.* Of or pertaining to Silesia. — *n.* A native or inhabitant of Silesia.

Silesian furnace *or* **process.** See ZINC.

Silesian Polish. The Polish dialect spoken in Silesia.

Silesian Wars. Three conflicts between Prussia and Austria. The *First Silesian War* (1740–42) and the *Second Silesian War* (1744–45) were phases of the War of the *Austrian Succession;* the *Third Silesian War* (1756–63) is another name for the *Seven Years' War.* See WAR, *Table.*

Si·letz′ (sĭ-lĕts′; sĕ-), *n.* An Indian of a Salishan tribe of the coast of Oregon. Also, loosely, any Indian of the many unrelated tribes of the Siletz reservation in Oregon.

si′lex (sī′lĕks), *n.* [L., a flint, a pebblestone.] Silica, SiO_2, esp. in the form of quartz, etc. See SILICA, SILICIC.

si′lex·ite (sī′lĕks-īt), *n.* [*silex* + *-ite.*] *Petrog.* An igneous rock composed essentially of quartz, occurring in dikes, and representing the end members of the pegmatitic intrusions; — called also *peracidite.*

sil′hou·ette′ (sĭl′ōō-ĕt′), *n.* [F., after Etienne de *Silhouette,* French minister of finance in 1759.] **1.** A representation of the outlines of an object filled in with black or some other uniform color; a profile of this kind, such as a shadow appears to be.

Silhouette.

2. The outline, or the delineation of the outline, of a person; esp., such outline as formed by one's costume; hence, a particular outline demanded by fashion; as, this year's *silhouette.* **3.** *Photog.* A photograph of essentially only two tones, showing the subject against a light background.

sil′hou·ette′, *v. t.;* SIL′HOU-ET′TED (-ĕt′ĕd; -ĭd; 119); SIL′HOU-ET′TING. To represent by a silhouette; to project upon a background, like a silhouette; — chiefly in *past part.*

A flock of roosting vultures, *silhouetted* on the sky. *G.W. Cable.*

— *v. i.* To appear in profile like a silhouette.

sil′hou·et′tist (sĭl′ōō-ĕt′ĭst), *n.* One who makes silhouettes.

sil′hou·et′to·graph (-ō-grăf; 83), *n.* [*silhouette* + *-graph.*] A photograph of a person's shadow, used esp. as a record of posture.

sil′i·ca (sĭl′ĭ-kȧ), *n.* [NL., fr. L. *silex, silicis,* a flint.] *Chem.* Silicon dioxide, or silicic anhydride, SiO_2, occurring naturally in crystalline form as quartz, tridymite, etc. and in amorphous form as opal. Sand is impure silica. Silica may be prepared artificially as a fine white powder and also in colloidal form. See SILICA GEL, SILICIC ACID. Fused silica is often called *quartz glass* (which see).

silica brick. *Ceramics.* Brick made from crushed quartzite bonded with milk of lime, constituting a high-grade refractory.

silica gel. *Chem.* A form of colloidal silica, like coarse sand in appearance, but possessing many fine pores and therefore extremely absorbent.

sil′i·cam (sĭl′ĭ-kăm), *n.* [G., shortened fr. *siliciumstickstoffimid;* the ending *-am* is due to its analogy with *phospham.*] *Chem.* A compound of silicon, nitrogen, and hydrogen, Si_2N_2H, obtained as an inert powder by heating silicon imide in nitrogen; — called also *silicon nitrimide.*

sil′i·cate (sĭl′ĭ-kāt), *n.* [Cf. F. *silicate.*] *Chem.* A compound regarded as a salt or ester of any of the silicic acids; — called specif. *monosilicate* (*orthosilicate, metasilicate*) or *polysilicate* (*di-, trisilicate,* etc.) according to the particular acid. See SILICIC ACID. In mineralogical chemistry the silicates are of great importance, forming by far the largest class of minerals. Their complexity and occurrence as isomorphous mixtures renders them difficult to classify. Dana recognizes the following divisions: (1) *disilicates,* derived from $H_2Si_2O_5$, oxygen ratio 4:1, and *polysilicates,* from $H_2Si_3O_8$, oxygen ratio 3:1; (2) *metasilicates* or *bisilicates,* from H_2SiO_3, oxygen ratio 2:1; (3) *orthosilicates,* or *unisilicates,* from H_4SiO_4, oxygen ratio 1:1; (4) *subsilicates,* having an oxygen ratio of less than 1:1 and regarded in most cases as basic salts of acids mentioned above. There are also many *hydrous silicates,* as zeolites and hydrated decomposition products.

Since we really know little more than the empirical formulae of most of the *silicates,* the numerous attempts which have been made to classify the different silicates are more or less tentative, or speculative.

sil′i·cate (sĭl′ĭ-kāt), *v. t.* To combine with silica or silicates; to coat or impregnate with silica or silicates. — **sil′i·ca′tion** (-kā′shŭn), *n.*

silicate cotton. Mineral wool.

sil′i·cat′ed soap (sĭl′ĭ-kāt′ĕd; -ĭd; 119). A hard soap containing sodium silicate.

silicate of soda. = SODIUM SILICATE.

silicate paint. A paint the vehicle of which consists chiefly of water glass, used esp. for painting on mortar.

sil′i·ca·ti·za′tion (-kȧ-tĭ-zā′shŭn; -tī-zā′-), *n.* Silicification.

silica ware. *Ceramics.* Ware consisting of silica, usually pure sand, partly or wholly fused and shaped into tubes, dishes, and beakers for use as scientific apparatus.

si·li′ce·o- (sĭ-lĭsh′ē-ō-), **A** combining form for *siliceous,* denoting *siliceous and,* as in **si·li′ce·o·cal·car′e·ous, si·li′ce·o·o·fel·spath′ic, si·li′ce·o·flu·or′ic.**

si·li′ceous (sĭ-lĭsh′ŭs), *adj.* Also **si·li′cious.** [L. *siliceus,* fr. *silex, silicis,* a flint.] **1.** Of or pertaining to silica; containing silica, or partaking of its nature. **2.** Growing in a soil composed largely of silica; — said of plants.

sil′i·ci- (sĭl′ĭ-sĭ-; sĭ-lĭs′ĭ-), A combining form for *silex* or *silica,* as in *siliciferous;* — used also for *siliceous and,* as in **sil′i·ci·cal·car′e·ous, sil′i·ci·flu·or′ic.**

si·lic′ic (sĭ-lĭs′ĭk), *adj.* [L. *silex, silicis,* a flint; cf. F. *silicique.*] *Chem.* Pert. to or derived from, silica or silicon; specif., designating compounds of silicon; as, *silicic* acid.

silicic acid. Any of various weakly acid substances obtained as gelatinous masses (colloidal silicic acids or *colloidal silica*) by treating certain silicates with acids or as white powders by dehydrating these masses, and in other ways. They have not been obtained in pure form, and while regarded by some as hydrates of silica, SiO_2, they are held by others not to be true compounds. Silicic acids have been classed (according to the number of silicon atoms in the molecule) as *monosilicic acids* (*orthosilicic acid,* H_4SiO_4, and *metasilicic acid,* H_2SiO_3) and *polysilicic acids* (as the *disilicic acid,* $H_2Si_2O_5$, the *trisilicic acid,* $H_2Si_3O_8$, etc.). Silicates regarded as derived from these and similar acids are known.

silicic anhydride. = SILICA.

sil′i·cic′o·lous (sĭl′ĭ-sĭk′ō-lŭs), *adj.* [*silici-* + *-colous.*] Growing in siliceous soil.

sil′i·cide (sĭl′ĭ-sīd; -sĭd), *n.* *Chem.* A binary compound of silicon with an element or a radical.

si·lic′i·dize (sĭ-lĭs′ĭ-dīz), *v. t.* [See -IZE.] *Chem.* To convert into a silicide.

sil′i·cif′er·ous (sĭl′ĭ-sĭf′ĕr-ŭs), *adj.* [L. *silex, silicis,* a flint + E. *-ferous.*] Producing, containing, or united with, silica.

si·lic′i·fi·ca′tion (sĭ-lĭs′ĭ-fĭ-kā′shŭn), *n.* [See SILICIFY.] *Chem.* Act or process of silicifying; state of being silicified.

si·lic′i·fied wood (sĭ-lĭs′ĭ-fīd). Quartz formed by the replacement of wood by infiltration of a silica solution.

si·lic′i·fy (sĭ-lĭs′ĭ-fī), *v. t.;* -FIED (-fīd); -FY′ING (-fī′ĭng). [L. *silex, silicis,* a flint + E. *-fy;* cf. F. *silicifier.*] To convert into or to impregnate with, silica. — *v. i.* To become silicified.

si·lic′i·o·phite (sĭ-lĭs′ĭ-ō-fīt), *n.* [*silici-* + *ophite.*] *Petrog.* Serpentine penetrated by opal.

si·li′cious (sĭ-lĭsh′ŭs), *adj.* Siliceous.

Sil′i·ci·spon′gi·ae (sĭl′ĭ-sĭ-spŏn′jĭ-ē), *n. pl.* [NL. See SILEX; SPONGE.] *Zool.* A division of sponges including in its broadest sense all except the Calcarea. Its members usually have a skeleton of siliceous spicules or spongin fibers or both.

si·li′ci·um (sĭ-lĭsh′ĭ-ŭm; sĭ-lĭs′-), *n.* [NL.] *Chem.* = SILICON.

silicium bronze. Silicon bronze.

sil′i·ci′u·ret′ted (sĭl′ĭ-sĭ′ū-rĕt′ĕd; -ĭd; 119), *adj.* [See SILICON; -URET.] Combined or impregnated with silicon. *Now Rare.*

siliciuretted hydrogen. = SILICON HYDRIDE.

sil′i·cize (sĭl′ĭ-sīz), *v. t.* [See -IZE.] *Chem.* To treat with silicon or silica.

sil′i·cle (sĭl′ĭ-k'l), *n.* [F. or L.; F. *silicule,* fr. L. *silicula,* dim. of *siliqua* a pod or husk.] *Bot.* A silique broader than it is long. See FRUIT, *Table & Illust.*

sil′i·co- (sĭl′ĭ-kō-), **silic-.** *Chem.* A combining form of *silicon,* denoting: **a** The *presence of silicon* or *its compounds,* as in *silicofluoride;* — used specif. in naming compounds in which silicon partly or wholly replaces carbon, as in **sil′i·co·a·ce′tic ac′id,** CH_3SiO_2H, and calcium **sil′i·co·cy′a·nide,** $Ca(SiN)_2$. **b** In adjectives, *silicic and,* as in **sil′i·co·al′ka·line, sil′i·co·fer·ru′gi·nous, sil′i·co·mag·ne′sian, sil′i·co·talc′ose.** — **sil′i·co,** *adj.*

sil′i·co·ar′se·nide (-är′sē-nīd; -nĭd), *n.* A compound with silicon and arsenic; as, zinc *silicoarsenide.*

sil′i·co·cal·car′e·ous (-kăl·kär′ē-ŭs), *adj.* Silicicalcareous.

sil′i·co·chlo′ro·form (-klō′rō-fôrm; 181), *n.* *Chem.* A colorless, fuming, inflammable liquid, $SiHCl_3$, obtained by heating silicon in hydrogen chloride; — so called from its analogy in formula to chloroform.

sil′i·co·eth′ane (-ĕth′ān), *n.* [*silico-* + *ethane.*] *Chem.* Either of two compounds, $CSiH_6$ and Si_2H_6, regarded as derived from ethane by substituting silicon for carbon. See SILICON HYDRIDE.

Sil′i·co·flag′el·la′ta (-flăj′ĕ-lā′tȧ), *n. pl.* Also **-tae** (-tē). [NL. See SILICA; FLAGELLATE.] *Biol.* A group of marine flagellates having one or two flagella, a nucleus, and a spiny siliceous skeleton like that of radiolarians, among which they were formerly classified. They are now regarded as a family, **Sil′i·co·fla·gel′li·dae** (-flȧ-jĕl′ĭ-dē), of the order Chrysomonadina. — **sil′i·co·flag′el·late** (-flăj′ĕ-lāt), *n.*

Sil′le·na′ce·ae (sĭl′ĭ-nā′sē-ē), *n. pl.* [NL., fr. *Silene.* See SILENE.] *Bot.* Syn. of CARYOPHYLLACEAE. — **sil′le·na′ceous** (-shŭs), *adj.*

Si·le·na′ies (sĭ-lē-nā′ĭz), *n. pl.* [NL.] *Bot.* In Lindley's classification, an alliance comprising the pink family, etc. — **si·le′nal** (sĭ-lē′nĭl), *adj.* *Obs.*

si′len·cy, *n.* = SILENCE. *Rare.*

si·le′ni, *n., pl.* of SILENUS.

si′lenst. Silenced. *Ref. Sp.*

si′lent·ish, *adj.* See -ISH.

si′lent·ly, *adv.* of SILENT.

si′lent·ness, *n.* See -NESS.

silf. Sylph. *Ref. Sp.*

sil′green (sĭl′grēn), *n.* = SEN-GREEN. *Obs. exc. Dial. Eng.*

sil′hou·et′. Silhouette. *Ref. Sp.*

silic-. = SILICO-. [CON HYDRIDE.

sil′i·cane (sĭl′ĭ-kān), *n.* See SILI-

Sil·li′ce·a (sĭ-lĭsh′ē-ȧ; sĭ-lĭs′-), *n. pl.* [NL.] *Zool.* = SILICISPONGIAE. — **sĭ·li′cean** (-lĭsh′ăn; -lĭs′-ē-ăn), *adj. & n.* [MINE, 1 a.

siliceous calamine. See CALA-

siliceous sinter. See SINTER, *n.,* 1.

siliceous water. See MINERAL WATER.

sil′i·ci·fu′ret, *n.* Silicide. *Obs.*

sil′i·co·a·lu′mi·nate (sĭl′ĭ-kō-ȧ-lū′mĭ-nāt), *n.* = ALUMINOSILICATE.

sil′i·ci·flu′o·ride (sĭl′ĭ-sĭ-flōō′ō-rīd; -rĭd; 157; 242), *n.* Also **-rid.** [*silici-* + *fluoride.*] *Chem.* = FLUOSILICATE.

‖ Foreign Word. † Obsolete Variant of. + combined with. = equals. Abbreviations, Signs, etc., are explained on pages immediately preceding the Vocabulary.

sil'i·co·hy'dro·car'bon (sĭl'ĭ·kō·hī'drō·kär'bŏn), *n. Chem.* Any silicon hydride; also, any compound of silicon, carbon, and hydrogen.

sil'i·co·man'ga·nese (sĭl'ĭ·kō·măng'gȧ·nēs; -nēz), *n.* A crude alloy of silicon and manganese, and some iron, used esp. in the manufacture of alloy steel. — **sil'i·co·man'ganese,** *adj.*

silicomanganese steel. Steel containing both silicon (1.25 to 1.50 per cent) and manganese (0.5 to 0.7 per cent) as alloying elements. Having a very high elasticity, it is esp. used for springs.

il'i·con (sĭl'ĭ·kŏn), *n.* [See SILICA.] *Chem.* A nonmetallic element occurring abundantly (always in combined form) in nature, being, next to oxygen, the chief elementary constituent of the earth's crust. Symbol, *Si*; at. no. 14; at. wt., 28.09. Free silicon has been obtained in various forms: as dark-gray crystals (sp. gr. 2.4) by heating silica with carbon in an electric furnace, as a dark-brown powder ("amorphous silicon") by heating silica with magnesium and magnesia, etc. Crystalline silicon is used in steelmaking as a deoxidizer and hardener. It melts at 1420° C. (2588° F.) and can be cast like iron. Chemically, silicon is chiefly quadrivalent, and analogous to carbon. Its most important compounds are silica and the silicates, which include a long series of rock-forming minerals, and are also constituents of glass, porcelain, Portland cement, etc.

silicon bronze. A very strong, practically noncorrodible alloy of copper, tin, and silicon.

silicon carbide. *Chem.* A compound of silicon and carbon; specif., the compound SiC, obtained as beautiful crystals next to the diamond in hardness, and often dark purple and iridescent. It is used in crushed form as an abrasive for grinding materials of low tensile strength, as cast iron, bronze, and other alloys (see ABRASIVE), and as a refractory. It is made by heating carbon and sand together in an electric resistance furnace and is sold under various trade-mark names, as *Carborundum*.

silicon copper. *Metal.* An alloy of copper (80–70 per cent) and silicon (20–30 per cent) used as an ingredient to free molten copper or brass from oxygen.

silicon dioxide. = SILICA.

silicon fluoride. *Chem.* Any fluoride of silicon; specif., a colorless, fuming, suffocating gas, SiF_4, made by action of fluorine on silicon and otherwise; — called also *silicon tetrafluoride.*

silicon hydride. *Chem.* Any of several compounds of silicon with hydrogen, analogous in composition to certain hydrocarbons; specif., a colorless, faintly odorous gas, SiH_4, called also *silicane, monosilane, silane,* or *silicomethane. Disilane, disilicane,* or *silicoethane,* Si_2H_6, is a colorless, mobile liquid of disagreeable odor; *trisilane, trisilicane,* or *silicopropane,* Si_3H_8, is a colorless, mobile, unstable liquid; higher hydrides are also known.

sil'i·con·ize (sĭl'ĭ·kŏn·īz), *v. t.;* -IZED (-īzd); -IZ'ING (-īz'-ĭng). [*silicon* + *-ize.*] To cause to combine with silicon.

silicon nitrimide. Silicam.

sil'i·con spie'gel. A spiegeleisen containing 15–20 per cent of manganese and 8–15 per cent of silicon, used in making certain special steels. Cf. SPIEGELEISEN.

silicon star. *Astrophysics.* A star whose spectrum shows considerable silicon; — a term used in older stellar classification, but since superseded.

silicon steel. A variety of steel containing considerable silicon, usually 2 to 3 per cent. After a double heat treatment it assumes high magnetic permeability accompanied by high electrical resistance, making it valuable for electromagnets.

silicon tetrachloride. *Chem.* A colorless fuming liquid, $SiCl_4$, made by heating silicon or silicon carbide with chlorine, and in other ways. It has been used for smoke screens and in making organic derivatives of silicon.

silicon tetraethyl. *Chem.* A colorless oily liquid, $Si(C_2H_5)_4$, formed by reaction between silicon tetrachloride and zinc ethyl; — called also *silicononane, tetraethylsilane,* etc.

silicon tetrafluoride. *Chem.* See SILICON FLUORIDE.

sil'i·co·pro'pane (sĭl'ĭ·kō·prō'pān), *n. Chem.* Any compound regarded as derived from propane by substituting silicon for carbon; specif., the compound Si_3H_8. See SILICON HYDRIDE.

sil'i·co'sis (sĭl'ĭ·kō'sĭs), *n.* [NL., fr. *silic-* + *-osis.*] *Med.* A form of pneumoconiosis occurring in stonecutters, miners, and others regularly exposed to silicate or quartz dust. — **sil'i·cot'ic** (-kŏt'ĭk), *adj. & n.*

sil'i·co·ti'tan·ate (-kō·tī'tăn·āt), *n. Mineral Chem.* A combined silicate and titanate.

sil'i·co·tung'state (-tŭng'stāt), *n. Chem.* A salt of silicotungstic acid.

sil'i·co·tung'stic (sĭl'ĭ·kō·tŭng'stĭk), *adj. Chem.* Pertaining to or designating any of a series of complex acids of silicon and tungsten, esp. the one having the formula $H_4SiW_{12}O_{40}$ ($nH_2SiW_{12}O_{40}$). It is crystalline and is used in precipitating alkaloids.

si·lic'u·la (sĭ·lĭk'ū·lȧ), *n.* [L.] *Bot.* A silicle.

si·lic'u·lar (sĭ·lĭk'ū·lĕr), *adj. Bot.* Having the form or appearance of a silicle.

sil'i·cule (sĭl'ĭ·kūl), *n. Bot.* A silicle.

si·lic'u·lose (sĭ·lĭk'ū·lōs), *adj.* [NL. *siliculosus,* fr. L. *silicula;* cf. F. *siliculeux.* See SILICLE.] *Bot.* **a** Bearing silicles. **b** Of the form or appearance of a silicle; silicular.

si·lic'u·lous (sĭ·lĭk'ū·lŭs), *adj.* Siliculose.

sil'i·cyl (sĭl'ĭ·sĭl), *n. Chem.* **a** The bivalent radical SiO. **b** Preferably, the univalent radical, SiH_3, of which silicane is the hydride.

Sil'il·pan' (sē'lē·pän'), *n.* An Igorot tribe in Nueva Vizcaya, Luzon.

sil'i·qua (sĭl'ĭ·kwȧ), *n.; pl.* -QUAE (-kwē). [L. See SILIQUE.] **1.** *Bot.* A silique.
2. A carat weight. See CARAT, 2.
3. A Roman silver coin, first issued by Constantine the Great, the ½₂₄ solidus; later, the half miliarensis.
— **sil'i·qua'ceous** (-kwā'shŭs), *adj.*

Sil'i·qua'ri·a (sĭl'ĭ·kwā'rĭ·ȧ; 79), *n.* [NL. See SILIQUE.] *Zool.* A genus of marine wormshell-like gastropods (family Vermetidae) differing from *Vermetus* in having a continuous slit or row of clefts or pores throughout the whorls of the shell. It is sometimes separated as a family, **Sil'i·qua·ri'i·dae** (-kwȧ·rĭ'ĭ·dē).

si·lique' (sĭ·lēk'; sĭl'ĭk), *n.* [F., fr. L. *siliqua* a pod or husk, a very small weight or measure.] *Bot.* A narrow elongated many-seeded capsule characteristic of the mustard or cress family, consisting of two valves with a false dissepiment, and opening by sutures at either margin. The seeds are attached to two parietal placentas. See FRUIT, *Table & Illust.*

siliqui-. *Bot.* A combining form for *siliqua,* as in **sil'i·quif'er·ous, si·liq'ui·form.** See -FEROUS; -FORM.

sil'i·quose (sĭl'ĭ·kwōs), **sil'i·quous** (-kwŭs), *adj.* [NL. *siliquosus;* cf. F. *siliqueux.*] *Bot.* Bearing or having the form of a silique.

silk (sĭlk), *n.* [ME. *silk, selk,* fr. AS. *seolc, seoloc;* akin to ON. *silki,* Sw. & Dan. *silke;* perh. through Slavic from an Oriental source; cf. Lith. *šilkai,* Russ. *shelk;* or fr. LL. *sericum* Seric stuff, silk. Cf. SERIC, SERICEOUS, SERGE.] **1.** The fine, strong, lustrous fiber produced by various insect larvae, generally to form their nest or cocoon; esp., that produced by certain caterpillars (the silkworms) and used for weaving into fabrics. The caterpillars secrete the silk as a viscous fluid in two large glands in the lateral parts of the body. These communicate by ducts with the spinneret on the labium (under lip). The silk from the two glands is united in a single thread, which quickly hardens. The caterpillar spins or produces this thread and winds it about itself so as to form a covering or cocoon in which it passes the pupa stage. In the case of the domesticated silkworm much of the thread may often (after softening and loosening the cocoon by immersion in warm water) be reeled off in a single piece (see also 1st FLOSS, 1). Raw silk contains 20–30 per cent of sericin, or silk glue, and is harsh and stiff. *Boiled,* or *boiled-off, silk,* is fine, soft, and white, with all glue removed by steeping and boiling in soap baths; *ecru silk* is harsher, and has not over 5 per cent of its original weight removed. See also SOUPLE, *adj.*
2. Thread or cloth made of the above material.
3. A particular fabric or a garment of such material; specif., *Eng.,* a gown worn by the king's (or queen's) counselor or barrister of high rank, appointed by the Lord Chancellor. Hence, by extension, a king's or queen's counsel; the rank or persons entitled to this distinction. See SILK GOWN.
4. a A thread or filament resembling silk, produced by some other animal. The threads of some spiders' webs are almost as strong as those produced by the silkworms and have been similarly used, though such use has not been made commercially successful. The byssal threads of a mollusk (the pinna) have also been woven into cloth. **b** A thread of such material, or of wire, as that used in a machine for sifting flour.
5. Something silklike; as: **a** *U. S.* The silky styles on an ear of Indian corn. **b** *Jewelry.* Inclusions of minute crystals that impart a silky luster to some gems, as rubies, and accounted a defect.

silk'worm' (sĭlk'wŭrm'), *n.* [AS. *seolcwyrm.*] **1.** The larva of any of certain moths, which spins a large amount of strong silk in constructing its cocoon before changing to a pupa. The common domesticated silkworm is the larva of a moth (*Bombyx mori*) which is yellow and measures about an inch and a half across the extended wings. It is supposed to be a native of China, but has been domesticated for many centuries, and is no longer known in the wild state. Its cultivation was introduced into western Asia and Europe early in the Christian Era, and into America during the colonial period. It feeds on the leaves of the white and certain other species of mulberry and of the Osage orange. Many varieties or races of the worm have been developed by Asiatic and European breeders, which may differ in the number of annual generations (cf. BIVOLTINE, TRIVOLTINE). A comparatively small amount of silk is furnished by the larvae of various moths of the family Saturniidae, as the tussah silkworm (*Antheraea paphia,* syn. *mylitta*) of India, the yamamai silkworm (*A. yamamai*) of Japan, and the pernyi silkworm (*A. pernyi*) and the ailanthus silkworm (*Philosamia cynthia*) of China. The last named has been introduced into Europe and North America. In America unsuccessful efforts have been made to use commercially the silk of various native species.

Silkworm (*Bombyx mori*). *a* Larva; *b* Pupa; *c* Adult Female; *d* Adult Male.

It also has the highest thermal and electric conductivity of any substance. Symbol, *Ag* (Latin *argentum*); at. no., 47; at. wt., 107.880. Silver is found native, and also combined with sulphur, arsenic, antimony, chlorine, etc., in the minerals stephanite, argentite, proustite, pyrargyrite, cerargyrite, etc. The metal is obtained as a main product (see PATIO PROCESS, WASHOE PROCESS), and as a by-product in copper and lead smelting. It is one of the "noble" metals, not being easily oxidized, and is used for coin, jewelry, plate, and a great variety of articles. It is usually alloyed with copper to increase its hardness, sterling silver having a fineness of 925, United States coin silver of 900. Pure silver melts at 961° C. (1762° F.) and has a sp. gr., when cast, of about 10.5. Chemically, silver is chiefly univalent, forming a series of salts, some being used in photography. So-called ***molecular silver*** is a gray, powdery, active form obtained by reducing silver chloride with zinc.
2. Silver as a commodity; as, *silver* has risen.
3. Coin made of silver; silver money; money (in general).
4. Silverware; an article, or articles collectively, of domestic use, as tableware, made of or plated with silver.

"You have *simple* wits." *Shak.* **c** Evincing but mediocre quality or ability; as, this *simple* translation. "My shallow *simple* skill." *Shak.* **d** *Now Chiefly Dial.* Feeble, esp. from illness.

8. *Bot.* Without subdivision or branches, as a stem; having only one blade, or not compound, as a leaf; consisting of a single carpel, as an ovary.

9. *Chem.* Elementary; as, unmixed.

10. *Eccl.* Celebrated at vespers by ferial psalms; — of offices and feasts.

11. *Logic.* Admitting of no analysis into parts. *Now Rare.*

12. *Math.* **a** Not complex or compound; — said of fractions, numbers, magnitudes, operations, equations, interest, etc. See phrases beginning with *complex* and *compound.* **b** Not reducible; — said of an algebraic curve or surface.

13. *Mineral.* Homogeneous.

14. *Music.* **a** Not compound; as, a *simple* measure. See TIME, *n.*, 22. **b** Without overtones; as, a *simple* tone. **c** Without keys, valves, or finger holes; as, a *simple* tube. **d** Free from elaboration or figuration; as, *simple* harmony or counterpoint. **e** Not greater than an octave; as, a *simple* interval.

15. *Zool.* Consisting of a single individual; — opposed to *compound.* Cf. COMPOUND ANIMAL.

☞ For many *simple* phrases, see the second word.

☞ COMBINATIONS are:

simple-armed	simpleheartedness	simple-seeming
simple-headed	simple-leaved	simple-stemmed
simplehearted	simple-mannered	simple-tuned
simpleheartedly	simple-rooted	simple-witted

Syn. — SIMPLE, INNOCENT, ARTLESS, NAÏVE, UNSOPHISTICATED. SIMPLE, as here compared, implies esp. lack of art or affectation; it may also suggest such inexperience as renders one liable to be duped; as, "We seem almost to obtain our innocent sweet *simple* years again" (*Cowper*); "schools in which plebeian minds, once *simple*, are initiated in [such] arts" (*id.*); "The secret mischiefs that I set abroach . . . I do beweep to many *simple* gulls" (*Shak.*). INNOCENT implies a guileless or unsuspecting nature or demeanor; ARTLESS heightens the implication of ingenuousness; as, "She blushed with the *innocent* consciousness of a child" (*Stevenson*); "How was she, who was as *innocent* as a child, to know what was the meaning of the covert addresses of a villain?" (*Thackeray*); "She was pleased with the girl's *artless* looks, and gay, *innocent* manner" (*id.*); "overflowing with . . . *artless* maternal gratitude" (*Jane Austen*). NAÏVE (cf. FRANK) commonly suggests engaging or refreshing artlessness; UNSOPHISTICATED, the stronger word, sometimes (but not always) implies a touch of contempt; as, "that earlier Florentine style, with its *naïve* . . . sensuousness" (*W. Pater*); a *naïve* question; "I wish that all English readers had your *unsophisticated* . . . taste" (*Cowper*); a raw and *unsophisticated* youth.

Ant. — Artful, affected, wily; intricate, complicated, elaborate, fancy, luxurious; sophisticated, worldly-wise.

sim′ple (sĭm′p'l), *n.* [F. See SIMPLE, *adj.*] **1.** **a** A person of humble birth or condition; — commonly used in contrast with *gentle*; also, such persons collectively. **b** An ignorant or simple-minded person; also, such persons collectively.

7. *Gram.* A primitive.

8. *Pharm.* A vegetable drug or a medicinal preparation composed of but one ingredient.

9. *Philos.* An element in a complex; esp. an unanalyzable constituent.

10. *Weaving.* A part of the apparatus for raising the heddles of a drawloom; hence, *Rare*, a drawloom with this device.

sim′ple (sĭm′p'l), *v.;* SIM′PLED (-p'ld); SIM′PLING (-plĭng). *Transitive:* **1.** To make simple; to simplify. *Rare.*

2. To cause (a compound steam engine) to work like a simple engine, as in starting a heavy train, by admitting live steam directly from the boiler to the low-pressure cylinder. *Railroad Engin.*

——, *Intransitive:* To go about gathering simples, or medicinal plants.

sim′ple, *adv.* **1.** Simply.

2. *Mach.* As a simple (single-cylinder) engine.

Sim′ple, *n.* A servant to Slender in Shakespeare's *Merry Wives of Windsor.*

simple algebra. See ALGEBRA, *n.*, 2.

simple astigmatism. *Med.* Astigmatism in which one of the principle meridians of the eye is emmetropic (normal) and the other either hyperopic or myopic.

simple beam. *Civ. Engin.* A beam which rests on two supports, one at each end.

simple bitters. See BITTERS, 1.

simple branch point. *Math.* See BRANCH POINT.

simple chain. See CHAIN, *n.*, 9.

simple concept. *Logic.* A concept of which no other can be directly predicated and which cannot therefore logically be defined; as, "being" is a *simple concept.*

simple consequence. *Logic.* = IMMEDIATE INFERENCE **a.**

simple contract. See CONTRACT, 1; PAROL, *adj.*, 2.

simple conversion. *Logic.* See CONVERSION.

simple curve. **1.** *Math.* A curve whose co-ordinates are real functions of a real variable, t, in an interval $a \leq t \leq b$ which are continuous for every value of t in this interval.

2. *Railroads.* A circular arc used in joining two tangents. Cf. COMPOUND CURVE.

simple duple time. See TIME, *n.*, 22.

simple engine. **a** An engine, esp. a steam engine, in which the expansion is completed in a single cylinder. Cf. COMPOUND ENGINE. **b** A steam engine in which the live steam is fed directly to the cylinders (usually two or four) and after a single use of its expansive force is allowed to escape through the exhaust; — contrasted with COMPOUND ENGINE.

simple enumeration. See INDUCTION, 8.

simple enunciation. *Logic.* = SIMPLE PROPOSITION.

simple equation. *Alg.* An equation containing but one unknown quantity, and that only in first degree.

simple ether. *Chem.* See ETHER, 2 **b** & **c.**

simple eye. *Zool.* An eye having a single lens; — opposed to *compound eye.*

sim′ple-faced′ (sĭm′p'l-fāst′; 66), *adj.* *Zool.* Having no nasal appendages; — said of vespertilionine bats.

simple form. *Schol.* Pure form; form apart from matter.

simple fraction. *Math.* The ratio of two integers; — opposed to *complex fraction.*

simple fruit. A fruit that matures from a single enlarged ovary. See FRUIT, *Table & Illust.*

simple future. *Gram.* See FUTURE, *n.*, 7.

simple glyceride. *Chem.* See GLYCERIDE.

simple governor. See GOVERNOR, *n.*, 6 (1).

simple group. *Math.* A group that has no self-conjugate subgroup besides the identical substitution; — opposed to *composite group.*

simple harmonic function. *Math.* A function represented algebraically by the sine or cosine of a variable angle, as $y = a \cos (nx - c)$, geometrically by a sinusoid, and mechanically by a simple harmonic motion.

simple harmonic motion. *Physics & Math.* The projection of uniform circular motion on any diameter of the circle in which the motion occurs; hence, a motion of the form $x = a \cos wt$ where w is a constant. The period of the *simple harmonic motion* is $\frac{2\pi}{w}$ and the reciprocal of this, $\frac{w}{2\pi}$, is its frequency. The combination, in any way, of two or more simple harmonic motions, makes *compound harmonic motion.* The motion of the pendulum bob of a clock is approximately simple harmonic motion.

Simple Harmonic Motion. Starting from B, as P moves round the Circle with uniform velocity, A (the Projection of P on the Diameter BC) moves along the Diameter from B to C and back with Simple Harmonic Motion.

simple honors. *Bridge.* Three honors held by the same side, in the trump suit.

simple idea. *Philos.* An idea of an unanalyzable quality such as *blue* or *round. Locke.*

simple immersion. *Electroplating.* Immersion without the application of an external electromotive force, causing an interchange of metal with the deposition of a thin metallic film.

simple in belle, simple in petite. See SIMPLE, *n.*, 5.

simple indexing. *Mach.* A form of indirect circular indexing in which either the index plate or the index pin is maintained stationary during the indexing operation and in which there is only one movement of the pin or plate for each spacing. Cf. DIFFERENTIAL INDEXING.

simple interest. See INTEREST, *n.*, 3.

simple ketone. *Chem.* See KETONE.

simple knot. An overhand knot. See 2d KNOT, 1.

simple larceny. See LARCENY.

simple life. A life divested of the luxuries and artificialities of civilization. — **sim′ple-life′,** *adj.* — **sim′ple-lif′er,** *n.*

simple linear system (of curves). *Math.* A linear system of curves such that all the curves of the system which have a common point other than the base points of the system have no other common point.

simple machine. *Mech.* Any of six (or more) elementary mechanisms, formerly considered as the elements of which all machines were composed, including (1) the *lever* (with its fulcrum), (2) the *wheel and axle* (equivalent to a continuous lever, as is the next), (3) the *pulley*, (4) the *inclined plane* (making forced closure with a relatively sliding piece on its inclined face), (5) the *wedge* (equivalent to a double inclined plane), (6) the *screw*, combining a male and a female screw (equivalent to an inclined plane wrapped around a cylinder so as to convert rotation into straight-line motion, or vice versa). Some writers include the *toggle joint* and the *hydraulic press.* The so-called *funicular machine*, although not a machine at all, is also sometimes included. Often called *mechanical power.*

simple measure *or* **time.** See TIME, *n.*, 22.

simple microscope. See MICROSCOPE, 1.

sim′ple-mind′ed (66), *adj.* Devoid of subtlety; undesigning; unsuspecting; also, foolish; simple; having less than normal mental ability. — **sim′ple-mind′ed·ly,** *adv.* — **sim′ple-mind′ed·ness,** *n.*

simple motion. *Mech.* A motion in a straight line, circle or circular arc, or helix. Simple motion in a circle, when reciprocating, is called *oscillating.*

simple necessity. *Logic.* The necessity of that which cannot be denied without self-contradiction.

simple ore. *Metal.* An ore of only one metal.

simple pendulum. See PENDULUM, 1.

simple periodic wave. See WAVE, *n.*, 10.

simple polygon. *Math.* A polygon whose vertices are distinct, no three of them lying on a straight line, and such that no two nonadjacent sides have a common point.

simple prebend. *Eng. Eccl. Law.* A prebend with no jurisdiction annexed to it.

simple probation. *Logic.* A proof comprised in a single syllogism.

simple proposition. *Logic.* **a** A categorical proposition. **b** A proposition not resolvable into separate statements.

simple protein. *Biochem.* See PROTEIN.

sim′pler (sĭm′plĕr), *n.* **1.** One who collects simples, or medicinal plants; a herbalist; a simplist. *Obs. exc. Hist.*

2. One gulled by the lure of women. *Obs.*

simple radical. *Chem.* See RADICAL, *n.*, 4 **b.**

simple ratio. *Math.* Ratio between first powers of the terms.

simple reaction time. See REACTION TIME.

sim′pler's-joy′ (sĭm′plĕrz-joi′), *n.* Vervain.

simple sentence. *Gram.* A sentence having but one predication, and containing no subordinate clause. Either subject or predicate, or both these elements, may, however, be multiple and yet leave the sentence simple (*Casey and Cob struck out*).

Simple Simon. The subject of a popular nursery rhyme, of early and unknown authorship.

simple sirup. See SIRUP.

simple sweep. *Physics.* See SWEEP, *n.*, 21.

simple syllogism. *Logic.* A syllogism not resolvable into other syllogisms; also, a categorical syllogism, as contrasted with a hypothetical argument, or dilemma.

simple tense. *Gram.* A past, present, or future, used as a simple "point" tense. See TENSE.

simple tide. A tide theoretically resulting from the influence of the sun and the moon, if moving in circular orbits in the plane of the equator. See TIDAL CONSTANT.

simple time. *Music.* See TIME, *n.*, 22.

sim′ple·ton (sĭm′p'l-tŭn), *n.* [Humorous formation on *simple*, as if a surname in *-ton.* Cf. SINGLETON.] A person of weak intellect, or lacking in common sense; a silly person; a fool.

Syn. — See IDIOT.

sim′ple·to′ni·an (-tō′nĭ·ăn), *adj.* Of or pertaining to simpletons. — **sim′ple·to′ni·an·ism** (-ĭz′m), *n.*

sim′ple·ton′ic (-tŏn′ĭk), *adj.* Characteristic of a simpleton. — **sim′ple·ton·ism** (sĭm′p'l-tŭn·ĭz′m), *n.*

simple vault. *Arch.* A vault whose intrados consists of an unbroken surface.

simple vow. *R.C.Ch.* See VOW, 1.

si·mon′i·cal, *adj.* Simoniacal. — **si·mon′i·cal·ly,** *adv.* *Both Obs.*

si·mo′ni·ent, *n. & adj.* = SIMONIAC. *Obs.* [*Obs.*]

si·mo′ni·er, *n.* = SIMONIAC, *n.*

Si′mon·ite, *n.* A Simonian. *Obs.*

‖**si mo·nu·men′tum re·qui′ris cir·cum′spi·ce** (mō·nū′·mĕn′·tŭm). [L.] If you seek [his] monument, look around; — the epitaph of Sir Christopher Wren in St. Paul's, London.

si′mool, *n.* = SIMAL.

simorg, simorgh. ✝ SIMURGH.

sim′pa·thy. Sympathy. *Ref. Sp.*

sim′perd. Simpered. *Ref. Sp.*

sim′per-de-cock′et, sim′per-the-cock′et, *n.* An affected mincing air or a woman displaying affections. *Obs.*

sim′per·ing·ly, *adv.* of SIMPERING. *pres. part.*

simp′kin. Var. of SIMKIN.

sim′pl. Simple. *Ref. Sp.*

sim′ple·ness, *n.* See -NESS.

sim′plesse, *n.* [OF.] = SIMPLENESS. *Archaic.*

sim′ple-toned′ (66), *adj.* See [-TONED.]

sim′ple·ton·ish, *adj.* See -ISH.

sim′ple·ty, *n.* = SIMPLICITY. *Obs.*

sim′plex (sĭm′plĕks), *adj.* [L. See SIMPLE.] **1.** Simple; uncompounded.
2. More or less simple. Cf. DUPLEX. Specif.: **a** *Biol.* Characterized by the presence of only one member of a homologous chromosome pair. Cf. DUPLEX. **b** *Teleg.* Pertaining to a system in which only one message is sent over a line at a time.

sim′plex, *n.* **1.** *Gram.* A word of simple or uncompounded form.
2. *Math.* See LINEAR SPACE.

sim′plexed (sĭm′plĕkst), *adj. Teleg. & Teleph.* Designating or relating to a circuit that can be used for the simultaneous transmission of telephone and telegraph messages.

sim·plex′i·ty (sĭm·plĕk′sĭ·tĭ), *n.* Simplicity.

simplex pile. *Civil Engineering.* A type of bearing pile made by driving a steel shell, with a specially designed point, into the ground and filling with concrete as the shell is withdrawn. The point usually remains in the ground.

Sim′pli·ci·den·ta′ta (sĭm′plĭ·sĭ·dĕn·tā′tȧ), *n. pl.* [NL., fr. L. *simplex, -icis,* simple + *dens, dentis,* tooth.] *Zool.* A former suborder of Rodentia comprising the typical rodents (cf. RODENTIA) as opposed to the hares and their allies (cf. LAGOMORPHA). — **sim·plic′i·dent** (sĭm·plĭs′ĭ·dĕnt), *adj. & n.* — **sim′pli·ci·den′tate** (sĭm′plĭ·sĭ·dĕn′tāt), *adj.*

Sim′pli·cis′si·mus (zĭm′plē·tsĭs′ē·mōōs), *n.* [L., superl. of *simplex* simple.] The title and hero of a German picaresque novel (1668) by von Grimmelshausen, relating the adventures in Europe and the Orient of a simple-minded youth, who becomes soldier, jester, bourgeois, robber, pilgrim, slave, and hermit. From him is derived the title of an illustrated comic and satirical weekly paper, founded in Munich in 1896.

sim′pli·cist (sĭm′plĭ·sĭst), *n.* [L. *simplex, -icis,* simple.] One who believes in or practices simplism. — *adj.* Simplistic.

sim·pli·ci·tar′i·an (sĭm′plĭ·sĭ·târ′ĭ·ăn), *n.* An advocate of simplicity of life.

‖sim·pli′ci·ter (sĭm·plĭs′ĭ·tĕr), *adv.* [L.] Simply; naturally. Specif., *Law* (*chiefly Scots Law*), unconditionally; by itself; of its own nature; unqualifiedly.

sim·plic′i·ty (sĭm·plĭs′ĭ·tĭ), *n.; pl.* -TIES (-tĭz). [OF. *simplicité,* fr. L. *simplicitas,* fr. *simplex.* See SIMPLE.]
1. Quality or state of being simple; quality or state of being unmixed or uncompounded; as, the *simplicity* of metals or of earths.
2. Quality or state of being not complex, or of consisting of few parts; freedom from complexity, intricacy, or elaborateness; as, the *simplicity* of a machine; specif.: **a** Freedom from subtlety or abstruseness; patentness to understanding; clearness; as, the *simplicity* of a doctrine, an explanation, a demonstration. **b** Freedom from artificial ornament, pretentious style, or luxury; plainness; as, *simplicity* of dress.

simply connected surface. See ACYCLIC SURFACE.

simply isomorphic. See ISOMORPHIC, *adj.,* 3.

simply isomorphic algebras. *Math.* = *equivalent algebras,* under ALGEBRA, *n.,* 2.

simply ordered aggregate. *Math.* An aggregate M such that each of its elements m has a definite rank or order relatively to the other elements of M, so that, of any two elements m, m' whatever, it is known which has the higher and which the lower rank; this rank relation being such that if m is of lower rank than m' and m' of lower rank than m'' then m is of lower rank than m''. Called also *series.*

simply pinnate. See PINNATE, *adj.*

Simp′son's hon′ey-plant′ (sĭmp′s'nz; sĭm′-; 206). The figwort *Scrophularia marylandica.*

Simp′son's rule (sĭmp′s'nz; sĭm′-). [After Thomas *Simpson* (1710–61), Eng. mathematician.] Either of two rules for computing more or less approximately the area of a figure bounded by a straight base line, two terminal straight lines at right angles to it, and any irregular curve. The more common rule is: Area = one third the product of the common distance between the ordinates times the aggregate sum of the two extreme (bounding) ordinates, twice the sum of the intermediate odd ordinates, and four times the sum of the even ones, the figure being divided up into an even number of strips by equidistant ordinates parallel to the end lines.

sim′son (sĭm′s'n), *n.* Groundsel. *Dial. Eng.*

Sim′son line (sĭm′s'n). [After R. *Simson* (1687–1768), Scot. mathematician.] *Geom.* The line joining the feet of the perpendiculars let fall from any point on the circumcircle of a triangle upon the sides of the triangle. It is only when the point lies on the circumcircle of the triangle that the three feet of the perpendiculars lie on a straight line.

sim′u·la′cral (sĭm′ū·lā′krȧl), *adj.* Of or like an image.

sim′u·la′cre (sĭm′ū·lā′kĕr), *n.* [OF.] Image; likeness.

sim′u·la·crize (-lȧ·krīz), *v. i.* To simulate.

sim′u·la′crum (sĭm′ū·lā′krŭm), *n.; pl.* -LACRA (-krȧ). [L. See SIMULATE.] **1.** An image; something which is formed in the likeness of a being or thing.
2. A semblance having the form without the substance.
3. A phantom or shadowy likeness of something; esp., a vague, unreal semblance; a mock appearance; a sham.

sim′u·lance (sĭm′ū·lȧns), *n.* Simulation. *Rare.*

sim′u·lant (-lȧnt), *adj.* [L. *simulans, -antis,* pres. part. of *simulare* to simulate.] Simulating (something which it is not); having a deceptive appearance or resemblance; — with *of;* used esp. in *Biol.;* as, a stamen *simulant* of a petal, etc. — *n.* One that simulates something else.

sim′u·lar (sĭm′ū·lĕr), *n.* = SIMULATOR.

sim′u·lar, *adj.* Simulated; also, simulative.

sim′u·late (-lȧt), *adj.* [L. *simulatus,* past part. of *simulare* to simulate, fr. *similis* like. See SIMILAR; cf. DISSEMBLE, SEMBLANCE.] Feigned; pretended; specif., *Civil Law,* feigned; fictitious, as a conveyance made in fraud of one's creditors, or a bond executed by a minor (as in certain proceedings in Scots law).

sim′u·late (-lāt), *v.; -LAT′ED* (-lāt′ĕd; -ĭd; 119); -LAT′ING (-lāt′ĭng). *Transitive:* **1.** To assume or have the mere appearance of, without the reality; to assume the signs or indications of, falsely; to counterfeit; feign; imitate; as, to *simulate* insanity or loyalty; some moths *simulate* leaves.
2. *Med.* To take on the characteristics of (another disease); as, cancer of the lungs may *simulate* tuberculosis.
—, *Intransitive:* To feign.
Syn. — See ASSUME.

sim′u·la′tion (-lā′shŭn), *n.* [OF., fr. L. *simulatio.*]
1. Act of simulating, or assuming an appearance which is feigned, or not true; pretense or profession meant to deceive.
2. Assumption of a superficial semblance; a counterfeit display.
3. *Civil Law.* A feigned or fictitious transaction, as one to effect a fraud, or one done as a matter of form.
Syn. — SIMULATION, DISSIMULATION, HYPOCRISY, SANCTIMONY. SIMULATION is positive, and implies the assumption of a false appearance; DISSIMULATION is negative, and suggests the concealment of one's true nature or purpose; as, "*Dissimulation,* in the negative; when a man lets fall signs and arguments, that he is not what he is . . . *Simulation,* in the affirmative; when a man industriously and expressly feigns and pretends to be that he is not" (*Bacon*); "*Simulation* is a pretense of what is not, and *dissimulation* a concealment of what is" (*Tatler*). HYPOCRISY is a stronger word, and denotes esp. a false or insincere profession of goodness by one whose aims are selfish or whose life is corrupt; SANCTIMONY implies a pharisaical or canting assumption of piety; as, "I thought where all thy circling wiles would end — in feigned religion, smooth *hypocrisy*" (*Milton*); "men attired in greasy black suits, with dingy black neckties — all gifted with a *sanctimonious* snuffle, all . . . avid for buttered toast and muffins" (*J. A. Symonds*).
Cf. ASSUME, DISSEMBLE, IMPOSTOR.

sim′u·la′tive (sĭm′ū·lā′tĭv), *adj.* Characterized by or tending to simulation. — **sim′u·la′tive·ly,** *adv.*

It constitutes a family, **Sim′u·li′i·dae** (sĭm′ū·lĭ·ī′dē). — **si·mu′li·id** (sĭ·mū′lĭ·ĭd; sĭm′ū·lĭ′ĭd), *adj. & n.* — **si·mu′li·oid** (sĭ·mū′lĭ·oid), *adj. & n.*

Simulium. *a* Adult of Buffalo Gnat (*S. innenustum*), × 4; *b* Larva of another Species, × 5.

si′mul·ta·ne′i·ty (sĭ′mŭl·tȧ·nē′ĭ·tĭ; sĭm′ŭl-), *n.* Simultaneousness; also, an instance or example of simultaneous action.

si′mul·ta′ne·ous (sĭ′mŭl·tā′nē·ŭs; sĭm′ŭl-; 277), *adj.* [From L. *simul* at the same time, after momentaneous. See SAME.] Taking place or operating at the same time; as, *simultaneous* events.
Syn. — See CONTEMPORARY.
— **si′mul·ta′ne·ous·ly,** *adv.* — **si′mul·ta′ne·ous·ness,** *n.*

simultaneous association. *Psychol.* The uniting of elementary sensations and images in the perception or thought of a complex object. See FUSION; COLLIGATION; ASSIMILATION, 5 **b**.

simultaneous congruences. *Math.* Congruences satisfied by the same values (or sets of values) of the unknown quantity or quantities.

simultaneous equations. *Alg.* Two or more equations satisfied by the same sets of values of the unknown quantities.

simultaneous reaction. *Chem.* Any of two or more reactions occurring at the same time in the same system. The one regarded as most important is called the *principal reaction* and the others *side reactions.*

si·murgh′, si·murg′ (sē·mōōrg′), *n.* [Per. *sīmurgh.*] In Eastern mythology, a gigantic bird, the "all-knowing bird of ages," who dwells in Kaf and has seen the world thrice destroyed. It is prominently mentioned in the *Shah Namah.* It is probably the same as the roc.

sin (sĭn), *adv., prep., & conj.* Since. *Obs. exc. Scot. & Dial.*

sin (sĭn), *n.* [ME. *sinne,* fr. AS. *synn, syn;* akin to D. *zonde,* OS. *sundia,* OHG. *sunta,* G. *sünde,* ON., Dan., & Sw. *synd,* L. *sons, sontis,* guilty.] **1.** Transgression of the law of God; disobedience of the divine will; moral failure, esp. as religiously interpreted, as contrary to the will of God; failure to realize, in conduct and character, the moral ideal, at least as fully as possible under existing circumstances; failure to do as one ought toward one's fellow men. sine (sīn), *n.* [L. *sinus* a bend, gulf, bosom of a garment, used as trans. of Ar. *jayb* bosom of a garment, sine (in the latter sense fr. Skr. *jīva* bowstring, chord of an arc, sine). See SINUS.] **1.** A gulf. *Obs.*

2. *Math.* **a** Formerly, the perpendicular drawn from one extremity of an arc of a circle to the diameter drawn through the other extremity. **b** Now, the ratio of the length of this perpendicular (reckoned from the diameter to the circle) to that of the radius of the circle, taken + or — according as the perpendicular is drawn upward or downward from the diameter (in positive or in negative sense). The sine of a plane angle is the sine of the arc subtending that angle at the center of a circle of unit radius; or it is the ratio of the side opposite the angle, in a right-angled triangle, to the hypotenuse, or of the area of a parallelogram having such an angle to that of a rectangle having adjacent sides equal to the sides bounding the angle. Hence, the sine of a trihedral angle is taken as the ratio of the volume of a parallelepiped having such an angle to that of a cuboid with three concurrent edges equal to the edges bounding the angle; and so on for higher spaces and angles. The sine of any angle equals the sine of its supplement and is the negative of the sine of the negative angle. Analytically, the sine is defined by the infinite series sin $x = x - \frac{x^3}{3!} + \frac{x^5}{5!} - \ldots$ and the argument x may be any number real or complex. See TRIGONOMETRIC FUNCTION.

sine, *n.* A sinew. *Obs.*

sine (sĭn; *unstressed* sĭn). Var. of SIN (*adv.*).

2. *Obs.* **a** A bay of the sea. **b** A hole in the earth.
3. *Anat. & Zool.* A cavity; a recess or depression. Esp.: **a** A cavity in the substance of a bone of the skull which communicates with the nostrils and contains air, as the frontal *sinus*, etc. **b** A channel for venous blood. The sinuses of the brain are broad channels whose outer coats are formed by the dura mater. The sinuses of various invertebrates are merely spaces among the muscles and other viscera. **c** A dilatation in a canal or vessel, as at the commencement of the internal jugular vein. **d** A pallial sinus. See PALLIAL IMPRESSION. **e** A moderately deep indentation in the outer lip of the aperture of a univalve shell, as *Scissurella*. It is progressively filled in as the shell grows, forming a distinct band (the **sinus band**).
4. *Bot.* A depression between adjoining lobes, as of a leaf, corolla, etc. A sinus may be rounded, as in the leaf of the white oak, or acute, as in that of the red maple.
5. *Med.* A narrow, elongated cavity or tract extending from a focus of suppuration or other inflammatory softening to a free surface, through which pus discharges; as, a tuberculous *sinus* leading to the skin surface from a tuberculous bone.

si'nus·al (sī'nŭs·ăl), *adj. Anat. & Zool.* Of or pertaining to a sinus.

sinus arrhythmia. See ARRHYTHMIA.

sinus band. See SINUS, 3 **e**.

si'nus·i'tis (sī'nŭs·ī'tĭs; sĭn'ū·sĭ'-), *n.* [NL., fr. *sinus* + *-itis.*] *Med.* Inflammation of a sinus (sense 3 **a**).

si'nus of Mor·ga'gni (môr·gän'yē). [After G. B. *Morgagni*, It. anatomist.] *Anat.* A space at the upper back part of each side of the pharynx where the walls are deficient in muscular fibers and closed by the aponeurosis only.

sinus of the aorta. *Anat.* An expansion at the junction of the ascending and transverse parts of the aorta.

si'nus of Val·sal'va (văl·säl'vȧ). [After A. M. *Valsalva* (1666–1723), It. anatomist.] *Anat.* Any one of the pouches of the aorta and pulmonary artery behind the flaps of the semilunar valves. The blood in its regurgitation toward the heart enters these sinuses and closes the valves.

si'nus·oid (sī'nŭs·oid), *n.* [*sinus* + *-oid.*] *Geom.* **1.** The curve whose ordinates are proportional to the sines of the abscissas, the equation being $y = a \sin x$, the curve of sines. The *cosinusoid*, or cosine curve, $y = a \cos x$, is the same curve but with the *y*-axis through the point $x = \frac{\pi}{2}$ on the diagram illustrated.

Sinusoid.
x Abscissa; *y* Ordinate.

2. *Anat.* A minute endothelium-lined space or passage for blood in the tissues of an organ, esp. of the liver.

si'nus·oi'dal (-oi'dăl; -d'l), *adj.* Pertaining to a sinusoid; specif., *Physics & Math.*, capable of being graphically represented by a sinusoid; as, a *sinusoidal* current, function, wave, etc. — **si'nus·oi'dal·ly**, *adv.*

‖**si'nus po'cu·la'ris** (sī'nŭs pŏk'ū·lā'rĭs; 79). [NL. *pocularis* like a cup.] = UTRICULUS PROSTATICUS.

si'phac (sī'făk), *n.* [ML., fr. Ar. *ṣafāq.*] The peritoneum. *Obs.*

si'phoid (sī'foid), *n.* [L. *sipho* a siphon + E. *-oid*; cf. F. vase *siphoïde.*] A siphon bottle.

si'phon (sī'fŏn; -fŭn), *n.* Also **sy'phon.** [F. *siphon*, fr. L. *sipho*, *-onis*, fr. Gr. *siphōn* a siphon, tube, pipe.]

1. A pipe or tube bent to form two branches or legs of unequal effective length, by which a liquid can be transferred to a lower level, over an intermediate elevation, by the pressure of the atmosphere in forcing the liquid up the shorter branch of the pipe immersed in it, while the excess of weight of the liquid in the longer branch (when once filled) causes a continuous flow. The flow takes place only when the discharging extremity is lower than the liquid surface, and when no part of the pipe is higher above that surface than the same liquid will rise by atmospheric pressure (about 33 feet for water, 30 inches for mercury, near sea level). Hence: **a** A channel through which water passes as in a siphon. **b** Short for INVERTED SIPHON. **c** A siphon bottle.

a Siphon, through which water flows from the Dish *b*.

2. *Bot.* In certain of the red algae (see POLYSIPHONIA), one of the elongated cells surrounding the large central axial cell.

3. *Gas Mfg.* Any of several small reservoirs placed at certain points in a gas main to drain off condensed water.

4. *Zool.* **a** In many bivalve mollusks, either of a pair of posteriorly extending tubes formed by the coalescence and extension of the edges of the mantle lobes of each side of the body. The ventral tube (***inhalant***, or ***incurrent, siphon***) conducts water to the mouth, gills, etc.; the dorsal tube (***exhalant***, or ***excurrent, siphon***) carries away the waste water. The tubes are commonly more or less united externally, though their passages are separate. In the long (or soft) clam they form the so-called ***neck***. See LAMELLIBRANCHIATA, *Illust.* **b** In many gastropods, an anterior channellike prolongation of the mantle serving to conduct water to the gills. It is often protected by a grooved extension of the margin of the shell usually called the *canal*, but sometimes also *siphon*. **c** The swimming funnel of a cephalopod. See SWIMMING FUNNEL. **d** The membranous siphuncle of a shelled cephalopod. **e** The sucking proboscis of various arthropods. **f** In certain gephyreans, sea urchins, and polychaetous annelids, an accessory tube which branches from the alimentary canal near its anterior end and re-enters it farther back. **g** A honey tube of an aphid. **h** A tubular anal respiratory organ consisting of two grooved filaments, in bugs of the family Nepidae. **i** In Siphonophora, a feeding zooid or hydranth. **j** In ascidians, the branchial or atrial orifice, esp. when borne on a more or less produced tube.

si'phon (sī'fŏn; -fŭn), *v. t.;* SI'PHONED (-fŏnd; -fŭnd); SI'PHON·ING. To convey, or draw off, or empty, by or as by a siphon. — *v. i.* To pass or be conveyed by means of a siphon; — usually with *over;* — said of liquids.

siphon-. = SIPHONO-.

si'phon·a'ceous (sī'fŏn·ā'shŭs), *adj.* **a** *Bot. & Zool.* Characterized by presence of a siphon. **b** *Bot.* Of or pertaining to the Siphonales.

si'phon·age (sī'fŏn·ĭj), *n.* The action or use of a siphon.

si'phon·al (-ăl; -l), *adj.* Of, pert. to, or resembling, a siphon.

Si'pho·na'les (sī'fŏ·nā'lēz), *n. pl.* [NL.] *Bot.* A large order of marine and fresh-water green algae distinguished by having a complicated, often highly differentiated thallus without septa, or cross walls, and consisting essentially of a large multinucleate cell, or coenocyte. See VAUCHERIA.

siphon alga. An alga of the order Siphonales esp. one of the genus *Vaucheria.*

Si'pho·nap'ter·a (sī'fŏ·năp'tĕr·ȧ), *n. pl.* [NL. See SIPHON; APTERA.] *Zool.* An order of insects consisting of the fleas. — **si'pho·nap'ter·ous** (-ŭs), *adj.*

Si'pho·na'ri·a (sī'fŏ·nā'rĭ·ȧ; 79), *n.* [NL. See SIPHON.] *Zool.* A genus of limpet-shaped hermaphroditic marine gastropods (order Opisthobranchia), living between tides and usually having both lunglike organs and gills. It typifies a family, **Si'pho·na·ri'i·dae** (-nȧ·rī'ĭ·dē). — **si'pho·na'ri·id** (-nā'rĭ·ĭd), *adj. & n.*

Si'pho·na'ta (sī'fŏ·nā'tȧ), *n. pl.* [NL.] *Zool.* A division (formerly ranked as a suborder) of bivalve mollusks including all having siphons.

si'phon·ate (sī'fŏn·āt), *n.* Liquid drawn by means of a siphon.

si'phon·ate (sī'fŏn·āt), **si'phon·at'ed** (-āt'ĕd; -ĭd; 119), *adj.* Having a siphon or siphons.

siphon barometer. A form of barometer having the longer leg closed at the top, and the other communicating with the air. See BAROMETER, *Illust.*

siphon bottle. A bottle for holding aerated water. The water is driven out by the gas through a bent tube in the neck of the bottle.

siphon condenser. *Steam Engines.* A form of condenser in which the vacuum is maintained by the downward flow of water through a long vertical pipe.

siphon cup. *Mach.* An oil cup from which oil is siphoned to the part to be lubricated by a wick contained in a central tube, and bent over to dip in the oil.

si·pho'ne·ous (sī·fō'nē·ŭs), *adj. Bot.* Siphonaceous.

si'phon·et (sī'fŏn·ĕt), *n. Zool.* A honey tube of an aphid.

siphon gauge. A kind of vacuum or pressure gauge consisting of a glass tube closed at one end and partly filled with mercury.

siphoni-. A combining form for *siphon*, as in **si'pho·nif'er·ous** (sī'fŏ·nĭf'ĕr·ŭs), **si·phon'i·form** (sī·fŏn'ĭ·fôrm). See -FEROUS; -FORM.

si·pho'ni·a (sī·fō'nĭ·ȧ; 159), *n.* [Origin uncert.] Forbearing, a kind of lightweight overcoat.

si·phon'ic (sī·fŏn'ĭk), *adj.* **1.** Of or pert. to a siphon.

2. Characterized by siphonage.

si·pho'ni·um (sī·fō'nĭ·ŭm), *n.* [NL., fr. Gr. *siphōnion*, dim. of *siphōn.* See SIPHON.] *Zool.* A bony tube in some birds, connecting the tympanum with the air chambers of the articular piece of the mandible. — **si·pho'ni·al** (-ăl; 159), *adj.*

si'pho·no- (sī'fŏ·nō-), **siphon-.** A combining form, Greek *siphōno-*, from *siphōn* meaning *siphon, tube, pipe*, as in *Siphono*phora, *Siphon*aptera.

Si'pho·no·bran'chi·a'ta (sī'fŏ·nō·brăng'kĭ·ā'tȧ), *n. pl.* [NL. See SIPHON; -BRANCHIA.] *Zool.* In old classifications, a group of gastropods having the margin of the mantle produced into a siphon. — **si'pho·no·bran'chi·ate** (-brăng'kĭ·āt), *adj. & n.*

Si'pho·no·cla·da'les (sī'fŏ·nō·klȧ·dā'lēz), *n. pl.* [NL., fr. *Siphonocladus*, type genus (fr. *siphono-* + Gr. *klados* a branch) + *-ales.*] *Bot.* An order of filamentous green algae containing forms which are transitional from the Chaetophorales to the Siphonales in having the filaments septate but with the individual cells multinucleate, or coenocytic. It includes the Valoniaceae, Cladophoraceae, and Dasycladaceae. Cf. SIPHONALES.

si'pho·no·gam (sī'fŏ·nō·găm; sī·fŏn'-), *n. Bot.* A seed plant. See SPERMATOPHYTA.

si'pho·no·gam'ic (-găm'ĭk), *adj. Bot.* Siphonogamous.

si'pho·nog'a·mous (-nŏg'ȧ·mŭs), *adj.* [*siphono-* + *-gamous.*] *Bot.* Accomplishing fertilization by means of a pollen tube, as most seed plants. — **si'pho·nog'a·my** (-mĭ), *n.*

si'pho·no·glyph' (sī'fŏ·nō·glĭf'; sī·fŏn'-), *n.* [*siphono-* + Gr. *glyphein* to engrave.] *Zool.* In many actinozoans, a special groove leading down into the gullet from a corner of the mouth.

Si'pho·nog·nath'i·dae (sī'fŏ·nŏg·năth'ĭ·dē), *n. pl.* [NL., fr. *Siphonognathus*, type genus (fr. *siphono-* + Gr. *gnathos* jaw) + *-idae.*] *Zool.* A small family of Australian elongate fishes having the snout produced into a tube, related to the parrot fishes. There is but one genus, **Si'pho·nog'na·thus** (-nŏg'nȧ·thŭs). — **si'pho·nog'na·thid** (-thĭd), *n.* — **si'pho·nog'na·thous** (-thŭs), *adj.*

Si'pho·noph'o·ra (sī'fŏ·nŏf'ō·rȧ), *n. pl.* [NL., fr. *siphono-* + *-phora.*] *Zool.* An order of Hydrozoa consisting of certain free-swimming or floating pelagic forms, mostly delicate, transparent, and often beautifully colored. The Siphonophora are usually regarded as compound animals, composed of zooids modified to perform various functions for the colony, as feeding, defense, locomotion, etc. In some forms two or more zooids (called *nectocalyces*) have the form of a bell, and by their contractions the colony swims. In some there is a hollow *pneumatocyst* or *pneumatophore*, or float (often regarded as an enlarged and modified zooid), which keeps the colony afloat. They are sometimes considered to be single individuals, and the zooids organs. See PORTUGUESE MAN-OF-WAR, VELELLA, PORPITA, DIPHYES. — **si'pho·noph'o·ran** (-rȧn), *adj. & n.* — **si'pho·no·phore'** (sī'fŏ·nō·fôr'; sī·fŏn'ō-; 181), *n.* — **si'pho·noph'o·rous** (sī'fŏ·nŏf'ō·rŭs), *adj.*

si·phon'o·plax (sī·fŏn'ō·plăks), *n.* [NL., fr. *siphono-* + Gr. *plax* tablet.] *Zool.* One of the calcareous plates that protect the siphon of certain pholads.

si'pho·no·some' (sī'fŏ·nō·sōm'; sī·fŏn'-), *n.* [*siphono-* + 2d *-some.*] *Zool.* The part of the stock of a siphonophore bearing the nutritive and reproductive zooids.

si'pho·no·stele' (-stēl'; -stē'lē), *n.* [*siphono-* + *stele.*] *Bot.* A hollow cylindrical stele, with or without pith. In its typical form it is characteristic of the stems of ferns, but with modifications it is found in most dicotyledonous stems. Cf. PROTOSTELE. — **si'pho·no·ste'lic** (-stē'lĭk), *adj.*

si'pho·no·ste'ly (-stē'lĭ), *n.* The state or condition of being siphonostelic.

Si'pho·nos'to·ma (sī'fŏ·nŏs'tō·mȧ), *n. pl.* = SIPHONOSTOMATA **a.**

Si'pho·no·sto'ma·ta (sī'fŏ·nō·stō'mȧ·tȧ; -stōm'ȧ·tȧ), *n. pl.* [NL. See SIPHON; -STOMA.] *Zool.* **a** A tribe of parasitic copepod Crustacea including many parasites of fishes, as the lernaeans. They have a mouth adapted to suck blood. **b** An artificial group of marine snails possessing a canal for the passage of the siphon at the base of the aperture. — **si'pho·no·stome'** (sī'fŏ·nō·stōm'), *n.*

si'pho·no·stom'a·tous (-stŏm'ȧ·tŭs; -stō'mȧ·tŭs), *adj. Zool.* **a** Having the front edge of the aperture of the shell prolonged in the shape of a channel for the protection of the siphon; — said of certain marine snails. **b** Having a tubular mouth. **c** Pertaining to the Siphonostomata.

si'pho·nos'to·mous (sī'fŏ·nŏs'tō·mŭs), *adj.* [*siphono-* + *-stomous.*] *Zool.* Siphonostomatous.

si'pho·no·zo'oid (sī'fŏ·nō·zō'oid), *n.* [*siphono-* + *-zooid.*] *Zool.* One of certain degenerate zooids of some Alcyonaria, supposed to serve to regulate the water supply of the colony.

siphon recorder. *Elec.* A sensitive recorder used in submarine telegraphy, the record of which is an irregular line made by ink discharged from a small siphon.

siphon slide. *Micros.* A slide containing a cell through which water is made to circulate by means of siphons.

siphon spillway. A type of spillway which siphons water from a reservoir when a predetermined head is reached.

si·phon'u·la (sī·fŏn'ū·lȧ), *n.* [NL. dim. See SIPHON.] *Zool.* A bilaterally symmetrical larva of certain siphonophores.

si'pho·rhi'nal (sī'fŏ·rī'năl; -n'l), *adj.* [*siphon* + *-rhinal.*] Having tubular nostrils, as petrels. Also **si'pho·rhin'i·an** (-rĭn'ĭ·ăn), *adj.*

si'phun·cle (sī'fŭng·k'l), *n.* [L. *siphunculus, sipunculus*, dim. of *sipho.* See SIPHON.] *Zool.* **a** In shelled cephalopods: (1) A membranous tubular extension of the mantle which runs through the partitions of the chambers to the apex; — called also *siphon.* (2) The shelly structures (usually funnellike or tubular processes of the septa) which insheathe and support this tube. **b** A honey tube of an aphid.

si'phun·cled (sī'fŭng·k'ld), *adj.* Siphunculate.

si·phun'cu·lar (sī·fŭng'kū·lĕr), *adj.* Of, pertaining to, or of the nature of a siphuncle.

si·phun'cu·late (sī·fŭng'kū·lāt), *adj.* Having a siphuncle.

si·phun'cu·lat'ed (-lāt'ĕd; -ĭd; 119), *adj.* Siphunculate.

Si·pi'bo (sē·pē'bō), *n.* An Indian of a Panoan tribe, dwelling along the middle course of the Ucayali River in the Department of Loreto, Peru.

sip'id (sĭp'ĭd), *adj.* [From INSIPID.] Sapid. — **si·pid'i·ty** (sĭ·pĭd'ĭ·tĭ), *n.*

si'ping (sīp'ĭng), *n.* [From SIPE.] Seeping; percolation; *pl.* percolated liquid. *Obs. exc. Dial.*

si'ling (sīp'lĭng), *n.* Sapling. *N. of Eng.*

sip'per (sĭp'ĕr), *n.* **a** One who sips; hence, a bibber; toper. **b** A device, as a straw, paper cylinder, etc., adapted for sipping liquid.

sip'pet (-ĕt; -ĭt; 119), *n.* [See SIP, SOP.] **1.** A small bit or piece, esp. of toast, soaked in milk, broth, etc.; a small piece of toasted or fried bread for garnishing.

2. A small piece; a tiny bit; a fragment.

sip'pi·o (sĭp'ĭ·ō), *n.* A game of the bagatelle kind, played with eight object balls and a cue ball on a table having fifteen numbered holes into which the balls are driven.

sip'ple (sĭp''l), *n. & v.* [Dim. fr. SIP.] Tipple. *Chiefly Scot.*

Sip'py di'et *or* **treat'ment** (sĭp'ĭ). [After B. W. *Sippy* (1866–1924), Am. physician.] *Med.* A special diet including alkaline powders to neutralize the acidity of the gastric juice in the treatment of gastric and duodenal ulcer.

Si'pun·cu'li·da (sī'pŭng·kū'lĭ·dȧ), *n. pl.* [NL. See SIPHUNCLE; -IDA.] *Zool.* A group equiv. to the Sipunculoidea (in the narrowest sense). — **si·pun'cu·lid** (sī·pŭng'kū·lĭd), *n.*

Si·pun'cu·loi'de·a (sī·pŭng'kū·loi'dē·ȧ), *n. pl.* [NL. See SIPHUNCLE; -OID.] *Zool.* a Syn. of GEPHYREA. **b** A group of elongate, cylindrical marine worms, usually classed as an order of Gephyrea, lacking setae and having the anus anterior and dorsal, and the mouth situated at the end of a proboscislike introvert and usually provided with tentacles; also, sometimes, a larger group including the Priapuloidea as a subgroup. The type genus is **Si·pun'cu·lus** (-pŭng'kū·lŭs). — **si·pun'cu·loid** (-loid), *adj. & n.* — **si·pun'cu·lid** (-lĭd), *n.*

One of the Sipunculoidea (*Phascolosoma gouldii*). *A* Side View while expanded: *m* Oral Tentacles; *s* Nephridial Opening; *x* Anus. *B* Tentacles, enlarged.

si'py·lite (sĭp'ĭ·līt), *n.* [After *Sipylus*, one of the children of Niobe.] *Mineral.* A niobate of erbium and other rare-earth metals, usually occurring in brown to gray crystalline masses. H., 6. Sp. gr., 4.9.

sir'ward, *adv.* See -WARD.

sir·zer' (sĭr·zĕr'), *n.* Var. of SINJER. See MEASURE, *Table.*

sio'goon (shyō'gōōn), **sio'goonate** (-āt). Vars. of SHOGUN, SHOGUNATE.

si'o·lism. Sciolism. *Ref. Sp.*

Si'on (sī'ŭn), *n.* = ZION.

si'on, *n.* = 1st LAYER **a.**

-sion. See -TION.

Si'on·ite, *n.* = ZIONITE.

sip'age (sīp'ĭj). Var. of SEEPAGE. *Scot. & U. S.*

si·pa'hee, si·pa'hi (sē·pä'hē). Vars. of SEPOY.

sipers. † CYPRESS. [LIS.

Si·pun'cu·la'ce·a (sī·pŭng'kū·lā'shē·ȧ), *n. pl.* [NL., fr. *Sipunculus*, type genus. See SIPHUNCLE.] Syn. of SIPUNCULOIDEA. — **si·pun'cu·la'cean** (-shăn), *adj. & n.*

‖ **si quae'ris pen·in·su·lam a·moe'nam, cir·cum'spi·ce.** [L.] If thou seekest a beautiful peninsula, look around; — the motto of Michigan.

si quis (sī̆ kwĭs). [L., if anyone.] **a** *Obs.* A public written or printed notice or inquiry; a placard. **b** *Ch. of Eng.* A notification by a candidate for deacon's orders, published in the parish where he lives, of his intention to present himself at the next ordination unless an impediment is alleged.

sī′-quis′, *v. t.* To query or notify publicly; to advertise. *Rare.*

sir (sûr; 71), *n.* [ME. *sir, ser,* fr. *sire.* See SIRE; cf. SURLY.] **1. a** *Obs.* A man of social authority and dignity; a gentleman; esp., a man of rank; a lord; master; sovereign; — in this sense usually spelled *sire.*

In the election of a *sir* so rare. *Shak.*

b One suitably addressed by the title "Sir."

2. A title prefixed [*cap.*] to the Christian name of a knight or a baronet, formerly to that of one of higher rank; also, sometimes prefixed [*not cap.*] to his title of rank; as, *sir* knight.

3. Hence: **a** *Archaic.* Used as a title for names in history. "*Sir* Pandarus of Troy." *Shak.* **b** Used as a fanciful or derisive title; as, *sir* oracle. "*Sir* boy." *Shak.* **c** *Archaic.* Used as a title of respect for a priest; as, *sir* John. **d** [*cap.*] Used formerly as an academic title, rendering the Latin *dominus,* for a Bachelor of Arts in some English universities.

4. A respectful title used in addressing a man without using his name; — used esp. in speaking to elders or superiors; sometimes, also, used to imply emphatic formality or displeasure. Cf. SIRRAH. "What's that to you, *sir?*" *Sheridan.* Anciently, *sir* was often used in addressing one as having a certain office or profession. "*Sir* man of law." *Chaucer.* The title is used conventionally in the address and close of letters, as "Dear *sir,*" "I am, *sir,* very truly yours," and in addressing a speaker; as, *Sir,* I shall address my remarks directly to you and your friends.

5. *Obs. exc. Dial.* **a** A title addressed to gentlewomen. **b** A priest or clergyman.

☞ For some names beginning with *Sir,* see the principal word in the name.

sir (sûr), *v. t.;* SIRED (sûrd); SIR′ING. To address as "sir." — *v. i.* To use "sir" in address.

sir (sēr). Variant of SER.

Sir Ajax (ā′jăks). Sir John Harrington, author of *The Metamorphosis of Ajax* (i. e., *a jakes*), a treatise on sanitation.

Sir′a-jī′yah (sĭr′ä-jē′yä), *n.* [Ar. *Sirājīyah.*] One of the main Arabic treatises on Moslem law used by the judges in India. Its date is unknown.

sir·car′ (sēr-kär′; sûr′kär), *n.* [Hind. & Per. *sarkār* superintendent, overseer, chief, fr. Per. *sar* head + *kār* doer. Cf. CIRCAR.] *India.* **a** The government; the supreme authority; also, as a title, master. **b** In Bengal, a domestic servant; esp., a house steward or accountant. **c** In India, a district or province under the Mogul Empire.

sir·dar′ (sēr-där′), *n.* [Hind. & Per. *sardār,* fr. Per. *sar* head, top + *dār* holding, possessor.] **1.** In India, Afghanistan, etc., a native chief; also, a high military officer.

2. In India, a head palanquin bearer or a body servant; — called also **sirdar bearer.**

3. In Turkey, Egypt, etc., a commander in chief, esp. the commander in chief of the Anglo-Egyptian army; as the assassination of Sir Lee Stack, *sirdar* of the Egyptian army, precipitated a crisis in Anglo-Egyptian relations.

sire (sīr), *n.* [ME., fr. OF. *sire,* fr. L. *senior* older. See SENIOR; cf. SIR, SIRRAH.] **1.** A person of authority; a lord; master. See SIR, *n.,* 1. *Obs.*

sire (sīr). Scot. var. of 3d SEWER.

Si·re′don (sī-rē′dŏn), *n.* [NL., fr. Gr. *seirēdōn* siren.] See AXOLOTL.

sire′-found′ (sīr′found′), *adj.* Chosen by one's sire. *Rare.*

sire′-in-law′ (sīr′ĭn-lô′), *n.* Father-in-law.

si′ren (sī′rĕn; -rĭn), *n.* [L., fr. Gr. *seirēn;* cf. F. *sirène.*]

1. [*also cap.*] *Gr. Relig.* One of a group of minor divinities or deities associated with death, and sometimes represented as carrying off souls, or as mourning for the dead. They are represented with the heads, and sometimes the busts and arms, of women, but otherwise with the forms of birds. In myth the most celebrated are those who were said to lure mariners to destruction by their singing. Odysseus escaped them by filling his sailors' ears with wax and having himself lashed to the mast of his ship. In late classical times the sirens of the Odyssey were localized near the Surrentine promontory. Cf. PARTHENOPE.

Odysseus and the Sirens. (From a Greek vase.)

2. Hence: **a** A mermaid. **b** A woman who sings sweetly. **c** Something insidious or deceptive; esp., a woman of such character; an enticing, dangerous woman.

3. A device for sounding signals, esp. of warning, as on a steamer or automobile. Cf. def. 4, below.

4. [F. *sirène,* properly, a siren in sense 1.] Also **si·rene′** (sī-rēn′; sī′rēn), **sy′ren.** *Acoustics.* An apparatus producing musical tones by the rapid interruption of a current of air, steam, or other fluid by a perforated rotating disk or disks, used in acoustical investigations and, in a large form, as a fog signal. The frequency of the interruptions determines the pitch of the tone.

A Electric Siren with (*B*) interior view of same. 1 Stator pierced with Slots (2, 2) corresponding to Holes (3, 3) in Rotor (4); 5 Housing for high-speed motor; 6 Radial Fan Blades. As each hole in the rotor passes a slot in the stator, a puff of air is emitted, the successive puffs producing a tone whose pitch rises or falls as the number of puffs per second increases or decreases.

5. *Medieval Myth.* A fabulous serpent of deadly venom; — as in the Bestiaries. *Ayenbite of Inwit.*

See SHALLOW; cf. SCLEROSIS.] **1.** The bones of a human being or other vertebrate collectively; the bony or more or less cartilaginous framework supporting the soft tissues and protecting the internal organs. In *Biol.,* in a broader sense, the whole of the more rigid parts, esp. the supporting and protective structures, of any animal, or of any part of its body, or even of certain vegetable organisms, as diatoms. The spicules of a sponge, the stony framework of a coral, the shell of a mollusk, and the hard cuticle of a beetle, are examples. In invertebrates these structures are more often external to the soft parts (*exoskeletal*), in vertebrates chiefly internal (*endoskeletal*), supplemented by exoskeletal structures. See EXOSKELETON, ENDOSKELETON. In vertebrates most parts of the skeleton are formed in the embryo out of cartilage, which, except in primitive forms, is mostly replaced by bony tissue in the adult. The skeleton of a typical vertebrate consists chiefly of an ***axial skeleton*** (comprising the *skull, spinal column, ribs,* etc.) and an ***appendicular skeleton*** (the bones of the limbs, including also the *pectoral* and *pelvic arches,* by which they are supported). In man the number of bones is reckoned at about 200 (not counting the six auditory ossicles), but many bones separate in young individuals afterward become united. See MAN, *Illust.*

— **skep'ti·cal·ly,** *adv.* — **skep'ti·cal·ness,** *n.*
skep'ti·cism, scep'ti·cism (-tĭ·sĭz'm), *n.* [Cf. F. *scepticisme.*] **1.** *Philos.* The doctrine that true knowledge is impossible, or that all knowledge is uncertain; the position that no fact or truth can be established on philosophical grounds; also, the method of suspended judgment, destructive criticism, or systematic doubt, characteristic of skeptics. *Skepticism* as a point of view is opposed to *dogmatism,* and appears as a reaction from it. The earliest skeptics were the Greek Sophists, who maintained that "Man is the measure of all things," or that "Nothing is; or if anything is, it cannot be known," and the Pyrrhonists, who formed the first systematic school of skepticism (see PYRRHONISM, SOPHIST). The later writers of antiquity, esp. Sextus Empiricus (2d century A.D.), also represented skeptical thought. In the main, ancient skepticism was based upon the doctrines of the relativity of sense, knowledge, and human belief (cf. RELATIVITY OF KNOWLEDGE). The skeptical arguments were made use of by many Christian writers to prove the unreliability of human reason and the necessity for revelation for any valid knowledge. Skepticism as an element or stage in philosophic method was used both by St. Augustine and Descartes, who derived the necessity of individual existence from the mere attempt to doubt it (cf. COGITO ERGO SUM), while Hegel maintained that the skeptical is a necessary stage of every philosophic evolution. Modern skepticism, other than religious, finds its chief exponents in David Hume (see HUMISM) and Montaigne. Cf. ECLECTICISM.
2. An incredulous or doubting state of mind; the mental attitude of the skeptic.
3. Specif., doubt of, or unbelief in, theistic religion or Christianity.
skep'ti·cize, scep'ti·cize (skĕp'tĭ·sīz), *v. i.;* -CIZED (-sīzd); -CIZ'ING (-sĭz'ĭng). To doubt; also, to indulge in skepticism.

skew facet. *Jewelry.* One of the broad triangular facets which abut in pairs on the girdle of a brilliant between each pair of skill facets; — called also *cross facet.*
skew flashing. *Arch.* Lead flashing along the side of a gable.
skew gear. *Mach.* A skew bevel gear (see BEVEL GEAR).
skew gearing. *Mach.* A gearing consisting of skew bevel gears. See BEVEL GEAR.
skew'-gee' (skū'jē'), *v. i., n., & adv.* Skew. *Slang, U. S.*
skew helicoid. *Geom.* = SCREW SURFACE.
skew hinge. A hinge with oblique knuckle joints, as in a common form of rising hinge.
skew'ings, *n. pl.* Waste portions of gold leaf for remelting, or remnants of gold or Dutch metal leaf available for reusing.
skew'ness, *n.* **1.** The fact or quality of being skew; lack of straightness or symmetry; distortion.
2. *Statistics.* The state or quality of a frequency distribution of being bunched together on one side of the average and of tailing out on the other side. It results from lack of coincidence of the mode, median, and arithmetic mean, of the distribution. It is measured by the quotient of the difference between the arithmetic mean and the mode divided by the standard deviation. In *positive skewness,* the mean is greater than the mode; in *negative skewness,* the mode is greater than the mean.
skew pantograph. = PLAGIOGRAPH.
skew polygon. *Math.* A polygon whose sides do not all lie in one and the same plane.
skew put. = SKEW CORBEL.
skew surface. *Geom.* A ruled surface such that in general two consecutive generators do not intersect; — opposed to *developable surface.*
skew'-sym·met'ric, *adj. Math.* Of a matrix, such that the element in the *r*th row and *s*th column is the negative of the element in the *s*th row and *r*th column.
skew-symmetric determinant. *Math.* A determinant whose matrix is skew-symmetric.
skew-symmetric tensor. *Math.* = ALTERNATING TENSOR.
skew table. *Arch.* Any piece of solid masonry designed to take a diagonal thrust or pressure; in a gable wall, the skew at the top of the vertical corner. Cf. KNEELER.

a Skew Table or Skew, 2; *b* Coping.

skew'whiff' (skū'wĭf'), *adj. & adv.* Askew. *Dial. Eng.*
skew'wise' (-wīz'), *adv.* In a skew manner.
skew'y (-ĭ), *adj.* Askew. *Dial.*

skin (skĭn), *n.* [ON. *skinn* (Sw. *skinn*, Dan. *skind*); akin to G. *schinden* to skin.] **1.** The integument of an animal, separated from the body and with or without hair, whether green, dry, tanned, or dressed; specif., in commercial usage, that of a small animal, as a calf, sheep, or goat, as distinguished from the *hide* (which see) of a large animal.

Section of Skin of Human Scalp showing Roots of two Hairs. 1 Stratum Corneum of Epidermis; 2 Malpighian Layer of Epidermis; 3 Derma; 4 Subcutaneous Fat; 5, 5 Blood Vessels; 6, 6 Hairs; 7 Mouth of Hair Follicle; 8 Inner, & 9 Outer, Root Sheaths of Hair; 10 Fibrous Sheath of Follicle; 11 Vascular Papilla (which nourishes the hair); 12, 12 Sebaceous Glands; 13 One of Arrectores Pilorum Muscles; 14 Sweat Gland.

2. The hide or pelt of an animal made up into an article for use. Specif.: **a** *Archaic.* A sheet of parchment or vellum made from the whole or part of a hide. **b** A vessel of skin, used for liquids. See 2d BOTTLE, 1.

3. In literary use, the hide or pelt of a game animal, esp. of one to be hunted; hence, anticipated spoils or profits.

4. The external integument of an animal, esp. when of a tough but flexible character, as in most vertebrates. In vertebrates it is composed of two layers. The outer, the *epidermis* (which see), or *cuticle*, is composed of stratified ectodermal epithelium, and is without nerves or blood vessels. Only the deeper layers of cells of the epidermis are capable of growth. The more superficial layers usually change into horny material and wear away, or are cast off little by little, as in man, or they may be shed as a coherent membrane at longer intervals, as in snakes. Glands (in man the sebaceous glands and sweat glands, the orifices of the latter being called *pores*) open on the skin in most vertebrates, but are almost wanting in reptiles. The inner layer of the skin, the *derma, dermis,* or *corium,* is mesoblastic in origin and composed mainly of connective tissue. It contains abundant blood vessels and nerves. In many animals (armadillos, many reptiles, most fishes) bony plates or calcified scales develop in the derma. In invertebrates the commonest type of skin consists of a single layer (the *hypodermis*) of columnar ectodermal cells, which rest on an underlying basement membrane, and secrete an external noncellular cuticle. Differences in skin color (black, brown, yellow, white) characterizing the various races of man are due to differences in amount of pigment (melanin) in the *Malpighian layer* (which see). Such pigment is entirely wanting in the albino.

5. One's life or physical well-being; — often in phrase *to save one's skin.* "Pushing their fortunes at the risk of their precious *skins.*" *Conrad.*

6. The outermost layer, or surface, of anything, likened to a skin; as, the *skin* of a casting, a mold, or an electrical conductor.

7. A membranous film or scum, such as forms on boiling milk and on the surface of some paints and varnishes; a pellicle.

8. *Slang.* **a** *Now Rare.* A purse or pocketbook. **b** A contemptible person; specif., a skinflint. **c** A cheat or fraud; also, a sharper.

skull (skŭl), *n.* [ME. *skulle,* of Scand. origin; cf. Sw. *skulle,* Nor. *skalle;* akin to E. SHELL.] **1.** The skeleton of the head of a vertebrate; the bony or cartilaginous case or framework which encloses and protects the brain and chief sense organs, and supports the jaws. It is cartilaginous in primitive forms (cyclostomes and elasmobranchs) and in the embryos of all, but in most vertebrates the cartilage is mostly replaced by bones and the structure made more complete by the union with it of other bones developed in membrane. Some of the bones always become firmly sutured or ankylosed together to form a case (the *cranium*) for the brain. The ossification of the cartilaginous cranium of the embryo forms the elements of the sides, base, and rear, of the bony cranium, but its roof is formed chiefly of membrane bones (the *frontal* and *parietal bones*). The bony elements forming the capsules of the nose and ear are united with the cranium, but the capsule of the eye (the *sclerotic coat*) remains movable and usually entirely unossified although the adjacent bones of the skull form a socket (the orbit) to contain it. The jawbones are derived from the first visceral arch (see VISCERAL ARCH) of the embryo, usually supplemented by membrane bones. The upper jaw may be firmly (as in mammals) or movably (as in most fishes) connected with the cranium; the lower jaw is always movable. *Skull* often denotes only those parts immovably united with the cranium. See CRANIAL BONES, CRANIAL SEGMENTS, FACIAL BONES, CRANIOMETRY, *Illust.*

SHALLOP.] **1.** A fore-and-aft-rigged vessel with one mast and a single headsail jib. Prior to 1890 the mast of a sloop yacht was long, with a short topmast, and stepped well forward; the bowsprit was built permanently into the hull. The sails, of cotton, included a single large jib, set on a permanent stay from bowsprit end to masthead, and a gaff mainsail with the foot laced to the boom. The hull of the American sloop was wide and shoal, with inside ballast, and a centerboard to furnish lateral resistance. Since 1900 the former differences in hull between sloop and cutter have disappeared and the differences in rig have become assimilated. From 1920 the models of cruising and racing yachts have been practically the same in America and Europe, largely keel craft, the centerboard type being still in use in America. The smaller yachts are sloop-rigged, with a single jib; the larger are cutter-rigged, with jib and forestaysail. See CUTTER.

Syn. — SMALL, LITTLE, DIMINUTIVE, TINY, MINUTE, MINIATURE. *Small* (opposed to *large*) and *little* (opposed to *big, great*) are often used without distinction. But SMALL (which is more frequently than *little* applied to number, quantity, amount, and the like) often suggests that which is less than the ordinary or the expected; LITTLE is more absolute; it may also (cf. GREAT) connote tenderness or pathos, which *small* rarely does; as, a *small* house; cf. a *little* house; a *small* (not *little*) attendance; a *little* boy; cf. the *small* boy; "Sleep, my *little* one" (*Tennyson*); her pathetic *little* smile. Both *small* and *little* may connote insignificance or pettiness; as, a matter of *small* (or *little*) moment; "Laugh at *small* fools and lash *small* knaves" (*Churchill*); "A foolish consistency is the hobgoblin of *little* minds" (*Emerson*). DIMINUTIVE is stronger than *small*, and commonly implies comparison; as, "the snug fireside in our own *diminutive* parlor" (*Cowper*); "The horses are so *diminutive* that they might be, with propriety, said to be Lilliputian" (*id.*). TINY is the familiar and colloquial, MINUTE, the exact, word for that which is extremely small; as, "a little *tiny* boy" (*Shak.*); "The new moon put forth a little diamond peak, no bigger than . . . [the] *tiny* point of fairy scimitar" (*Keats*); a *minute* animalcule; "innumerable granules of extreme *minuteness*" (*Huxley*). That is MINIATURE which is on a very small scale; as, "a *miniature* creation" (*Gay*). See LESS; cf. PETTY, DWARF, CIRCUMSTANTIAL.
